SHORT HILLS, N.J.

1897.

JOHN N. MAY, RECEIVER.

Terms on which we do Business

Correspondence relating to the business should be addressed to the firm and not to any of the employes. By observing this rule unnecessary delays will be avoided.

Please Remit by Checks, Drafts on New York, Express, or Post Office Money Orders on the Short Hills Post Office, or by money in registered letters. Stamps are taken for small amounts. We shall not be responsible for money sent in unregistered letters.

No Charges are made for boxes, packing or delivery to the railroad station or express office, excepting on trees and shrubs, on which packing is charged at cost; cloth bags also are charged at cost—peck, 10 ets.; 1-2 bu., 12 ets.; bu., 15 ets.; 2 bus., 20 ets. All goods are carefully packed and may be sent safely to any part of the globe.

Complaints, if any, should be made immediately upon receipt of goods. We promise prompt and just treatment of all claims presented.

Gardeners. We have at all times upon our register the names, addresses and references of a number of thoroughly reliable and desirable Gardeners, with all particulars as to qualifications, which information we shall be glad to supply to inquiring patrons.

Warranty. While we exercise the greatest care to have all seeds pure, of the highest germinating power and true to name, we give no warranty, expressed or implied, in regard to the crop.

OUR PREMIUMS. This special feature of our Seed and Plant Catalogue, inaugurated by us last year, met with such universal favor (our files being full of complimentary letters from every section of the United States and Canada), that we have decided to continue this special inducement to secure new customers. All orders, whether from old or new customers, are treated impartially, and receive a collection of Flower Seeds, Vegetable Seeds, Bulbs, or Plants, in value proportionate to the amount of order.

Please Note.—These premiums are in every instance our own selection. Many customers, when sending orders, specify the varieties of Plants, Bulbs, or Seeds desired as premiums. We would state here that it is impossible to comply with these requests. The Premium Collections are put up in large quantities before the season begins, and it is not so much the value of the articles, as the time required to make up a special collection, which compels us to adhere strictly to this rule. It is always best to include in order all Seeds. Plants or Bulbs which are particularly desired.

FREE DELIVERY. Another special feature this year, which we feel certain will be welcomed and much appreciated by our numerous customers, is that all Seeds and Bulbs offered in this catalogue will be delivered free of postage or express charges to all points in the United States and Canada. We have decided to adopt this system, owing to the fact that in former years, customers have included in the same order goods which we agreed to prepay and those which should have been sent at customer's expense. This caused confusion, and the plan now adopted will, we think, please everyone. We have simply added the lowest express rates on the pound and hundred prices, thereby saving an enormous amount of unnecessary correspondence. Our net prices will be found as low as best quality stock can be sold.

Please Note.—All small plants will be sent by mail prepaid. Large plants must necessarily be shipped by express at customer's expense, in consequence of which prices have been quoted proportionately less.

Order Sheet. Please make out all orders on the order sheet enclosed with each catalogue, following the instructions there given.

Address all orders and communications of any kind to

PITCHER & MANDA, (Inc.)

JOHN N. MAY, Receiver.

Short Hills, New Jersey.

A SELECT LIST OF NEW VARIETIES

TOGETHER WITH THE BEST AND MOST POPULAR STANDARD SORTS.

Simple Cultural Directions will be found on all packets.

GIANT COMET ASTERS—New varieties.

Last season we offered for the first time the grand Giant Comet Aster "The Bride," the demand for which far exceeded that of any other Aster for 1896. This year we are able to offer our customers a superb collection of these wonderful flowers, ranging through the brightest shades of Red, White and Blue. These colors we will furnish separately, or in a collection, as follows:

"The Bride," white, changing to rose. Dark Blue, Rose, Crimson, Light Blue. White.

25c. per pkt., or the collection of six varieties, each correctly labeled, for \$1.00.

NEW MIGNON ASTER-Lilac.

A decided improvement on the Mignon Aster, "White, changing to Lilac," introduced several years ago, in that while the latter darkens considerably towards the close of the season, this new variety retains the delicate charm of its light Lilac shade until the very last. Per pkt., 25c.

Mignon Aster. White, changing to Lilac; White, changing to Rose; White, Rose, and Lilac-Blue. Each color separate, or mixed, 10c. per pkt. Collection—1 pkt. of each color, including Lilac, for 60c.

P. & M. Pays the Freight." We deliver all seeds and bulbs offered in this catalogue free by mail or express.

NEW ASTER-"Lady in White."

In habit of growth this new variety somewhat resembles the Mignon Aster, but much improved. The semi-globular flowers are borne on very slender stems, a single plant producing not less than forty buds, and sometimes as many as seventy. 15c. per pkt,; 2 pkts. for 25c.

THE "BRANCHING" ASTER.

The peculiar habit of this grand Aster has made it one of the most popular varieties with florists. Flowers are produced in the greatest profusion on long, stiff stems. White, Pink, Striped, Crimson, and Purple, each, per pkt., 15c. Collection of five colors, 60c.

A "STUDY IN ASTERS."

Seventeen packets of Aster Seed (one packet each of every variety on this page, all kept separate), at the prices quoted, amount to \$2.60.

THIS SUPERB COLLECTION.

presenting one of the largest ranges of forms and colors of one plant known to horticulture, will be sent, postpaid for only \$2.00.

Grow Chrysanthemums from seed. Our strain is unrivaled. 25c. and 50c. per pkt. See below.

Candytuft.

CENTROSEMA GRANDIFLORA.—(Look=at=Me.)

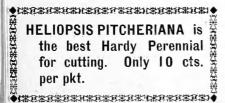

This is a new hardy perennial climber, with large pea-shaped White or Purple blossoms. It grows to the height of rom 6 to 8 feet in a single season, dying down to the ground in the fall, to reappear the following spring. 10 ets. per pkt.

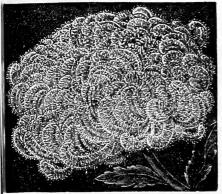

NEW MARGUERITE CARNATION.-Yellow.

Heretofore, seedlings with Yellow or Yellow-ground flowers have been produced very sparingly in the various classes of Perpetual Carnations. The continued perseverance of a noted German grower has at last been rewarded by the new variety here offered, of which the seedlings produce the desired shades in the proportion of about two-thirds. These exquisite flowers figure so conspicuously in the flower markets of the world, that this new strain will be received as a valuable acquisition. Per pkt., 35 cts.

Prize Chrysanthemum. !

PRIZE EXHIBITION CHRYSANTHEMUM SEED

Saved from our own superb collection. This strain of Chrysanthemum Seed we are pleased to say, has gained an international reputation, some of the most popular varieties of the age having been seedlings from this celebrated mixture. Our own sowings are made from identically the same stock offered below, which we have no doubt whatever will produce many prize-winners next season.

Choicest Strain. The best. 50 cts per pkt.; 5 pkts. for \$2.00.

Cobæa Scandens.

GOLDEN YELLOW COSMOS.

(Cosmos sulphureus.)

This unique plant, coming from Mexico, presents an entirely new color of that popular plant, the Cosmos, producing flowers of deep, clear Yellow at the end of the numerous slender stems, well furnished with finely divided glossy-green foliage, somewhat resembling the well-known Tagetes signata pumila. The numerous flower-heads measure from 1 to 1½ inches across, with fine oval ray florets, and are produced throughout the summer until destroyed by frost. It is a half-hardy annual and of the simplest culture. Its unique color will, we predict, make it one of our most popular annuals. Per pkt., 35c.

"California Improved" Cosmos.

A marvelous strain of giant Cosmos originated in California, having an endless range of forms and many beautiful shades and combinations of color. Claimed by the introducer to be far superior to any other strain in cultivation. Perpkt., 25c.

BULBS

We have a Complete Assortment of Summer Sum Varieties. See Pages 30 to 33.

10

Cyclamen Persicum Giganteum.

The choice strain we offer of this grand plant is saved expressly for us from select specimens, the blooms of which often measure 2 inches and over in length, and are produced in great abundance. The broad petals are borne on small flower stalks well above the foliage, which is beautifully mottled. White, Rose, Dark Red, White and Rose White and Dark Red. Each, 50c per pkt. Finest Mixed, 50c. per pkt.

Dahlia, Double, saved from splendid varieties; \$1.50 oz.....

Snowball Daisy.

DATURA.

Five beautiful varieties, including the gorgeous "Horn of Plenty," for 50 cents.

Datura cornucopia. (Horn of Plenty). One of the most popular novelties in flowers ever introduced. Discovered by one of our orchid collectors while exploring the wilds of South America. Seed sown in January, February or March will develop into large, bushy plants 3 feet high and produce 200 to 300 fragrant blooms during a single season. Imagine a plant 2 to 3½ feet high bearing a multitude of large, cornucopia-shaped blooms, nearly a foot long and half a foot wide at the mouth, formed by three perfect flowers growing each within the other; inside a delicate cream white, outside to the base a rich royal purple. At the recent Columbian Exposition it was awarded a gold medal and a diploma, and by the Royal Horticultural Society of London a first-class certificate of merit. 15 cts.

The following varieties of Daturas are identical in habit of plant and form of flower, with

C	ornuco	pia," but di	ffer in color.	pkt.

NEW FORGET-ME-NOT. Myosotis Alpestris Stricta Rosea.

Our illustration gives a fair idea of the striking beauty and peculiar habit of this unique plant. Instead of branching out sideways like the old varieties, the flower-stalks shoot up in a perpendicular column, producing a truly beautiful effect. Is of very robust growth and free flowering. Per pkt., 35 cts.

New Early Flowering Forget-Me-Not, "Distinction." AWARDED SILVER MEDAL AT DRESDEN JUBILEE EXHIBITION.

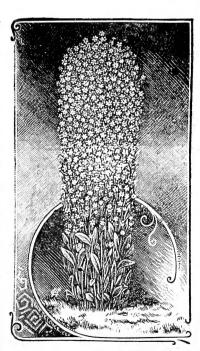

A wonderful new variety, quite different from all other forms of the Alpine Forget-Me-Not (which does not bloom until the second year), commencing to blossom eight to ten weeks after sowing, and if placed in a greenhouse in autumn, will continue flowering all winter and make very valuable material

for cutting; also forces well. Five to eight inches high, eight to ten inches in diameter, the plants are of stout, bushy habit of growth, bearing a profusion of bright azure-blue flowers, with the characteristic double centre bloom. This valuable novelty, with its long period of bloom, is not only of great utility for carpet-bedding, edging and masses, but especially for growing in pots and for cut-flower purposes. Per pkt., 25 cts.

HORN OF PLENTY-

THE EMBLEM OF PROSPERITY.

"Princess Maud," Gloxinia Hybrida Grandiflora.

This superb new variety is a grand addition to those already offered. Its throat is a light shining crimson-red, shading to the tip a rich, dark carmine, followed by a beautiful edging of pure violet, while a broad band of white spotted violet surrounds the whole of this fine, waved bloom. Per pkt., 35c.

Gloxinia. Superb mixed, 50c. per pkt.

Heliopsis Pitcheriana.

This valuable plant, introduced by us, is the best of the perennial daisy-like flowers for the border or for cutting. It is perfectly hardy, grows 2 to 3 feet in height, spreading 3 to 4 feet. The flowers, which are produced during the whole summer, measure 3 inches across, bright golden yellow; the leaves are dark green. Per pkt, 10c.

Heliopsis Pitcheriana.

Humulus Japonicus Variegatus. The New Variegated Leaved Japanese Hop.

The large, lobed leaves of this improved variety are distinctly marked and blotched with silvery white on a ground of dark green. 15c. per pkt.

Humulus Japonicus. 10c. per pkt.

NEW HELIOTROPE, "QUEEN MARGUERITE."

This is without doubt the most profuse blooming Heliotrope yet introduced, the plants being covered with immense, sweet-scented clusters of deep, dark blue flowers, often 12 to 14 inches in diameter and of the most delicate and delightful perfume, during almost the entire year. 25c. per pkt.

Lobelia Cardinalis Nanseniana.

This superb new variety, which has been dedicated to the celebrated explorer Nansen, greatly enriches the Lobelia Cardinalis group. It is distinguished from the type by a robust, dwarf growth and an increased profusion of flowers of a brilliant crimson-purple color, contrasting beautifully with the dark foliage. The largest blooming of its class, and comes absolutely true from seed. Per pkt., 35c.

Lobelia Cardinalis, "Firefly."

A magnificent variety with a beautiful bright green foliage, the fiery red flowers being borne on strong stems 12 to 15 inches long. Flowers continuously from July to October. Per pkt. 25c.

NEW "WINTER CHERRY." (Physalis Franchiti.)

The original stock of this new plant, seed of which is here offered for the first time, was imported from Japan, and is a giant in form. Grows erectly one and one-half to two feet, covered with beautiful foliage, which shows off its handsome seed-pods to great perfection. The latter, which is the striking feature of this plant, are almost globular, over two inches in diameter, of a striking orange-red tint, and enclose a cherry-like fruit of the same color, which is edible and especially recommended as a preserve. The intense color of the seed-pods, makes the plant very valuable for all sorts of decorative work, and it produces during August a most striking effect in the garden. Per pkt., 25 cts.

"Gem" Zinnias.

SWEET PEAS.

A Set of the Best new Varieties offered this year for the first time and of recent introduction.

"Cupid" Pure White Dwarf Sweet Pea.

This beautiful little plant, growing only 5 inches high, is entirely distinct from all known forms of the lathyrus family, and was first offered last year in very small packets. This season we have had grown for us in

Dwarf Sweet Pea, " Cupid."

very small packets. This season we have had grown for us in California a large stock of seed, and are thus in position to offer packets several times larger than last year at a lower price. We also offer it by weight, as noted below. This sterling novelty has been so extensively advertised, both in this country and Europe, that little description is necessary. The flowers are a clear, waxy white Two and sometimes three blossoms are borne on the end of each stem, all opening about the same time. The foliage is a deep cypress green, making a beautiful contrast with the pure white flowers. 15c. per pkt.; 2 pkts for 25c.; 50c. per oz.

New Sweet Pea, "Burpee's New Countess."

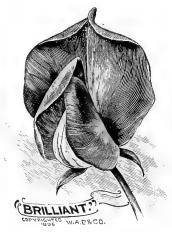

One of the best new varieties. Much improved over the old favorite, Countess of Radnor. Color pure light lavender throughout, both in standard and wings. Nothing more beautiful for bouquets. 15c. per pkt.; 2 pkts for 25c.

New Sweet Pea, "Brilliant."

One of the best improvements of late years in Sweet Peas; the color a rich, bright crimson scarlet, nearly uniform throughout the whole flower, which retains its full brilliancy of color under the hottest sun. The broad standards are inclined to "hood," while the wings are well spread; flowers borne three on a stem. 15c. per pkt.; 2 pkts. for 25c.

Extra Early Blanche Ferry.

Blooms two weeks earlier than any other variety yet introduced, is of dwarf habit and may be grown outside with great satisfaction without any support whatever. In color it is the same as the popular old Blanche Ferry, the wings being nearly white, while the standard is a rich, deep rosy pink, blending into a more intense shade towards the base. 10c. per pkt.; 25c. per oz.

00000

New Sweet Pea "Red Riding Hood." TX

An entirely new departure in form from the ordinary type, which when fully developed bears a striking resemblance to a hood or bonnet. Although unusually robust in habit, it is early flowering, aud is claimed to excel all other existing sorts in plentitude and continuity of bloom. The standard, which is diminutive and peculiarly convoluted, forms a hood around the wings, lending a novel and pleasing beauty to the flower. The standards and wings are a rosy pink, shading to blush white. The keel is nearly pure white. Is unusually fragrant and retains its stability a long time after being cut. Per pkt 25c.

New Sweet Pea "Aurora."

Sec.

Flowers gigantic in size, three and four on extra long and strong stems; vines vigorous in growth, and bloom most profusely. Color effect gorgeous, both standards and wings flaked and striped on a white ground, with bright orange salmon. Nothing more effective for bunching alone or to brighten a bouquet of assorted colors. Comes absolutely true from seed. 15c. per pkt.; 2 pkts. for 25c.

Our 1897———

** Sweet Pea Collection **

will be found on next page. . . .

ill be found on next page. . . . 25 Distinct Varieties for \$1.00.

New and Standard Sweet Peas.—Continued.

New Sweet Pea, "Oddity."

The marked peculiarity of this new variety is its irregularity of form, the standards being inclined to curl, as shown in illustration; stems are heavy and strong and usually bear four flowers. Pale carmine edged with bright rose. Per pkt., 25c.

"Celestial."

An entirely new color in Sweet Peas, which has made this variety exceedingly popular. The introducer describes it as a "wonderfully tender aerial blue, being especially attractive towards morning and evening." Per pkt. 10c.

Katherine Tracy.

The best pink Sweet Pea in cultivation. Standards are perfectly round, very thick, expanded and nearly flat, sufficiently curved to avoid stiffness. Per pkt., 10c.; per oz., 20c.

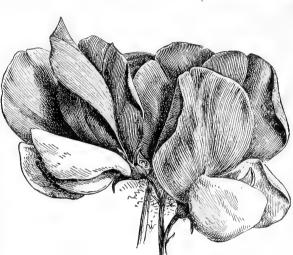

Sweet Pea, Celestial,

"Bride of Niagara."—Double Sweet Pea.

This is the nearest approach to that much abused flower the "Double Sweet Pea" that has yet been discovered. The introducer describes it as producing two and sometimes three beautiful banners to a blossom. The keel and wings are white while the banners are a clear pink. Per pkt., 25c.

25 Varieties—all kept separate-postpaid

OUR "ANNUAL" COLLECTION.

A Beautiful Flower Garden 25 Choicest Varieties that will Flower in a few weeks after sowing.

Asters, Balsams, Alyssum, Calliopsi

Chrysanthemum, Morning Glory, Eschscholtzia, Godetia, Gomphrena,

Marigold, Ice Plant, Mignonette, Nasturtium, Phlox Drummondii, Ricinus, or Castor Poppies, Oil Plant,

plete flower garden; a glory of exquisite rainbow colors to make home beautiful during the entire summer and autumn. Following are the varieties included in this valuable assortment. Simple cultural directions with each variety:

This superb collection represents a com-

Portulaca

mann

Ten-weeks Stocks, Sweet Peas, Sunflower, Zinnia.

OUR VEGETABLE SEEDS may be relied upon as of the best possible quality. They have been obtained under circumstances which give us positive knowledge as to the purity of the various kinds, and we believe no better seeds can be obtained anywhere at any price.

ASPARAGUS.

We would recommend the beginner to secure Asparagus roots rather than try to grow them himself from the seed, as the bed will come into bearing two years sooner in the former case than in the latter. The first and most important requisite for an Asparagus bed is rich soil; the ground should be well trenched and thoroughly enriched with rotted manure—the more the better. The plants should be set out in April, in rows about a foot apart and about 18 inches apart in the rows, the crowns being covered with three or four inches of earth. Cutting may begin the following spring, though sparingly the first year. Each year the tops should be cut down in autumn, and the bed given a good dressing of manure and a liberal application of coarse salt. This should be forked into the ground in early spring.

If grown from seed it may be planted in drills in the permanent bed and thinned out, or may be planted elsewhere and set out in the bed the second year. A bed 6 feet wide and 50 feet long will supply an ordinary family. This will require

one pound of seed or 300 plants.

Conover's Colossal. The standard variety. Stalks often 1½ inches in diameter, of the finest quality, Strong 2-years-old roots, \$1.25 per 100. Seed, pkt, 5c.; oz, 10c.; ½lb., 25c.

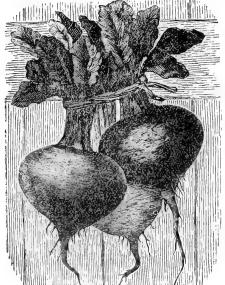

Palmetto. A recent introduction. Superior to the Colossal in being more productive, more even and regular in its growth, and in condition a week or two earlier, while it is its equal in quality. Strong 2-year-old roots, \$1.25 per 100. Seed, pkt, 5c.: oz., 15c.; 1/41b., 40c.

ARTICHOKE.

Sow the seed in spring in a rich, light, loamy soil, in drills about ten inches apart. Transplant the following spring into permanent beds, in hills three feet apart and two or three plants to the hill. In autumn cut down the old stalks and covers with a mulch of leaves or litter, to protect from frost.

Large Freuch Globe. The best variety. Buds large, deep purplish green: the scales very thick and fleshy. Pkt., 10c.; oz. 30c.; ¼ lb. 90c.

Jerusalem Artichokes. Grown for tubers. Qt. 25c.; pk. \$1 75.

Extra Early Ectipse Beet.

BEET.

The seed should be sown in early spring, and for succession until the first of July, in a rich, light, loamy soil which has been thoroughly pulverized. Sow in drills a foot apart, and thin the plants to six inches apart in the rows. One ounce to 50 feet of drill: five to six pounds to the acre.

rows. One dunce to so feet of drift; five to six pounds to	ше	acre.

BEANS.

Dwarf, or Bush Beans.

Sow in succession from the last of April to the middle of August, in drills about eighteen inches apart and two inches deep, dropping the beans two or three inches apart in the drill. Never hoe when the leaves are wet, as the plants are liable to rust. One quart to one hundred feet of drill; two bushels to the acre.

Bush Lima Beans.

Burpee's Dwarf Bush Lima. Same sized beans as Large White Pole Lima.

White Wax

Early Golden Cluster Pole Beans.

English Dwarf Beans.

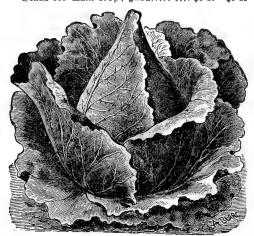

Sow in drills two feet apart, as early in the spring as the ground can be worked (these are as hardy as Peas), in order to get them into pod before the heat of summer. When in pod, break off the top of the plant to check the growth. Plant and hoe same as for Dwarf Beans. A strong soil suits them best. These beans are eaten shelled.

Broad Windsor. The largest and pt. best of the class of English Dwarf
Beans for main crop; good.......\$0 30 \$0 50 Per ⅓pk. \$1 75 \$3 00

A variety of Cabbage having the stem covered with small, closely-crowded heads; excellent for the table and popular. Cultivate the same as Cabbages.

Per pkt.	oz.	1/4 lb.
Tall Improved. A standard and reliable		
sort \$0 10	\$0.20	\$0 75
Dwarf Improved. Sprouts compact, of		
fine quality0	25	80

CABBAGE.

Cabbage requires a rich, well drained soil. For early crop the seed should be sown in the fall, about the middle of September and wintered in cold frames, or sown in a hotbed in February. About the first of April the plants may be set out in the field, in rows about 2 feet apart and 18 inches apart in the row. For succession of crop seed may be sown in April and planted out in May, and for late supply, seed sown in May may be planted out in July. ounce will produce about 1500 plants; one-half pound of seed will furnish plants

Imp. Long Orange Carrot.

CAULIFLOWER.

Cultivate much the same as cabbages, but the soil should be more heavily manured. Like Cabbage, the seed may be sown in the fall and wintered in a cold frame for early crop. One ounce will produce about 1500 plants.

Improved Snowball. By all odds the best Cauliflower known, whether for the small private garden or to grow for market. It is a week earlier than any other variety, is more dwarf in habit, though the head is as large and is more sure than any other variety of forming a head in a bad season. Per pkt., 25 cts.; per oz. \$4.

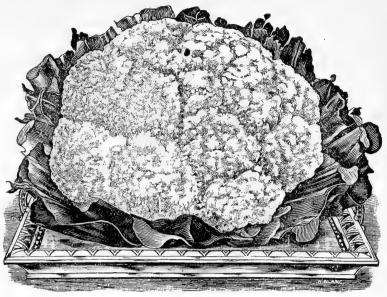

Extra Early Dwarf Erfurt. A favorite variety, much grown by market gardeners. Early and good. Per pkt., 25 cts.; per oz., \$4 00.

Large Algiers. A large late sort. Per pkt., 10 cts.; per oz., 80 cts.; ½ lb., \$2.50.

Lenormand's Short Stem. Has very large heads, white and firm. Per pkt., 10 cts.; per oz., 75 cts.; ½ lb., \$2.40.

Veitch's Autumn Giant. Vigorous in growth, and very large; late. Per pkt., 10 cts.; per oz., 50 cts.; ½ lb., \$1.75.

CAULIFLOWER PLANTS. Snowball. (Best variety.) From frames, \$2.25 per 100; \$18 per 1000.

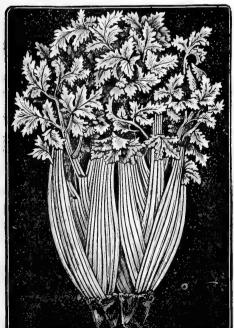

Improved Snowball Cauliflower.

CELERY.

Sow the seed in rich soil early in spring, and keep free from weeds until early in July, when they can be transplanted to their permanent position, where they should be planted in rows about three feet apart and about six inches apart in the rows. Cultivate well and earth up carefully to blanch the stems, compacting the earth around them nearly to the top.

Per	okt.	Per oz.	1/4 lb.	Per lb.
Improved White Plume. A variety of sterling worth, very early, and the handsomest Celery on the market, the tops being naturally almost white. Requires very little blanching	•	\$0 40	\$1 25	\$4 00
Giant Pascal. Tall growing variety, a little later than the White Plume; bleaches quickly. The stalks are long, entirely stringless, and possess a rich, nutty flavor	10	25	80	2 75
Golden Self-Blanching. In appearance resembling the White Plume, except in color, which is a bright yellow.	10	40	1 25	4 00
Golden Dwarf. The great Kalamazoo favorite. Solid, of good flavor	10	25	80	2 75

Boston Market. Of vigorous growth and excellent flavor	10	25	80	2 75
Sandringham. Dwarf, white, small, solid.	10	25	80	2 75
New Rose. Fine flavor, solid and crisp, keeps well London Red. Popular English sort of distinct	10	25	80	2 75
color.	10	25	80	2 75
Soup Celery, (Old Seed). Excellent for flavoring		05	15	35

White Plume Celery.

Celeriac, or Turnip-Rooted Celery.

These have edible roots, which are principally used for soups and stews. Requires no earthing up.

Erfurt Giaut. The best of the class; roots of large size and fine flavor. Per pkt., 10 cts.; per oz., 35 cts.; 1/4 lb., \$1.

Large Smooth Prague. A very fine variety. Per pkt, 10 cts.; per oz., 35 cts.; ¼ lb., \$1.

CELERY PLANTS. White Plume, Garden Dwarf, Golden Self-blanching, Giant Pascal, London Red, etc.; fine plants, ready in July and August. \$1 per 100; \$7 per 1000.

CHICORY.

The roots, roasted, are used as a substitute for coffee; these are grown commercially to a considerable extent.

Large Rooted. The only variety generally grown. Per pkt., 5 cts.; per oz. 20 cts.; ½ lb., 40 cts.; per lb., \$1.25.

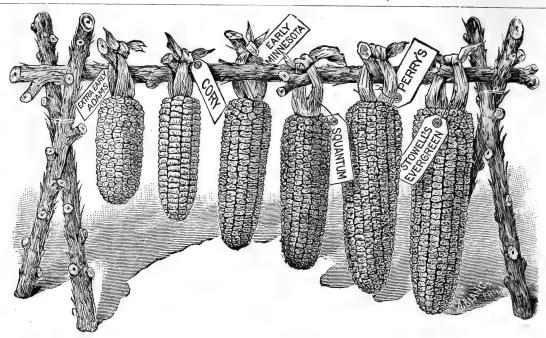

COLLARDS.

Sow seed, as for Cabbage, in June, July and August, for succession. Transplant when one month old, in rows a foot apart each way, and hoe frequently.

Georgia-grown. Per pkt., 5 cts; per oz., 15 cts.; 1/4 lb., 35 cts.; per lb., \$1.25.

CORN SALAD, or FETTICUS.

Largely grown as a winter salad. Sow in September, and on the approach of winter cover with straw or boards. Per pkt., 5 cts.; per oz., 15 cts.; ½ lb., 36 cts.; per lb., \$1.

CORN, SWEET, OR SUGAR.

Sweet Corn does best in a warm, rather dry, but highly enriched soil. Seed may be planted in hills (about six kernels to the hill), about three feet apart each way, at intervals from the middle of May to the first of July. By sowing in succession, the proper varieties of Corn fit for the table may be had until hard frost. One quart for 200 hills, eight to ten quarts to the acre.

Packet of any variety, 10 cts. postpaid.

Extra Early Cory. The earliest Sweet Corn. Ears large, light-colored, of good flavor; cob red\$	r Pt. 0 20	Per qt. \$0 35	1/2 pk. \$1 25	Per pk. \$2 00

Vienna Kohlrabi.

LETTUCE.

To obtain good Lettuce, a rich, open soil and an abundant supply of moisture during the entire growing season are necessary. Seed may be sown in hotbeds in March, to be set out when weather permits, and in the open ground from early April to the middle of August for a succession. Plants should be set a foot apart each way. The Cos varieties will require tying when grown, in order to blanch the leaves. One ounce will sow 150 feet of drill, and produce about 3000 plants.

Pitcher & Manda's Ice Lettuce.

Short Hills Lawn Grass.

How to Make New or Improve Old Garden Lawns, Lawn Tennis and Croquet Grounds and Bowling Greens.

LAWN GRASS SEED.

When making a new lawn or renovating an old one by sowing seed, the most important features to be considered are the texture of the soil, and location and surrounding influences. These should be studied before buying or sowing the seed, as grass varies, and its adaptability to different circumstances is as diverse as that of any other class of vegetation. This explains to a certain extent, we believe, the secret of so many failures in obtaining successful results from seed in making lawns, and convinces us of the uselessness of offering any one mixture as being suitable for all localities. To obviate this, we have concluded to offer three grades or mixtures, which cover the varied requirements.

It is necessary to sow the seed very thickly to get

requirements.

It is necessary to sow the seed very thickly to get the most pleasing result, sowing not less than four bushels to the acre, or one quart to a piece of ground 20x25 feet. In early spring or fall dig the ground well, rake and level it; and after the seed is sown, which should be done on a calm dry day, rake the seed in and roll well; or, in the absence of a roller, pack the ground down well with the back of a spade or shovel.

Our seed weighs about 20 pounds to the bushel.

No. 1. Suitable for exposed, dry, sandy soil, and most suitable for the southern states.

No. 2. Suitable for medium, shady or average soil.

No. 3. Suitable for wet or shady and clayey soil.

Prices for Lawn Grass Seed.

Prices for Lawn Grass Seed.

Each of the 3 mixtures, per pt., 20 cts.; per qt., 30 cts.; per two qts., 50 cts.; per peck, \$1.75. (Per bushel \$4.50 by express or freight, at customer's expense.)

When ordering, customers would do well to explain the situation in which they intend to sow, and de-scribe any peculiar influences bearing upon it, that we may, if necessary, make up a special mixture suit-able for their requirements.

Seeds for Pasture and Hay. Permanent or Temporary.

Permanent or Temporary.

The growing demand for this kind of crop proves that the sowing of mixed pasture seed is no longer an experiment, and those who have given it a fair trial cannot speak too highly in its favor. Autumn and spring are equally desirable seasons for sowing grass seed for pasture, either permanent or temporary, and persons contemplating laying down ground to hay for pasture should write us for particulars concerning the advisability of sowing our mixture in preference to Timothy, the article most frequently used by farmers in this section. Our pasture grass mixtures are superior to Timothy in many respects, producing a larger crop of nutritious grass; besides, they are permanent and not liable to be winter-killed.

Permanent and Temporary Pasture-Grass Mixture.

Our mixture for the above purpose, recommended in ordinary cases for medium soil, to produce grass and clover, should be sown fifty pounds to the acre. Per bu., \$2.25, or 3 bus, sufficient to plant one acre, \$5.50. (By express or freight at customer's expense.)

NATURAL GRASS SEEDS.
AGROSTIS canina (Rhode Island Bent Grass). A very fine variety for lawns

The Home Acre. By E. P. Roe. 12mo, cloth, \$1.50.

The Nursery Book. A Complete Hand-Book of Propagation and Pollination. By Professor L. H. Bailey, of the Cornell Experiment Station. The Book tells plainly and briefly what every one who shows a seed, makesa cutting or sets a graft wants to know. With about 100 illustrations. 12mo, cloth, \$1.

The Horticulturist's Rule-Book. By L. H. Bailey. Contains a great number of rules and receipts used by florists, gardeners, farmers, etc. Revised edition. 12mo, cloth, \$1.

Bulbs and Tuberous Rooted Plants. An excellent work on the culture of all leading bulbous plants. \$2.

Oress, prepaid, on the receipt of the stated price. Any other sprice.

Any of the above books will be sent by mail or express, prepaid, on the receipt of the stated price. Any other Horticultural or Farm books can be supplied at the publisher's price.

THE BULBS AND ROOTS OFFERED IN THE FOLLOWING PAGES SHOULD BE PLANTED IN THE SPRING AND WILL FLOWER DURING THE SUMMER MONTHS

BEGONIAS, Tuberous=rooted.

ROBABLY no family of plants has been hybridized with such success as this, the result being flowers both double and single, of innumerable shades of color, ranging from pure white, through rose and pink to intense crimson and fiery scarlet, and from the deepest yellow to tawny brown and brilliant orange, and often attaining a size of from five to six inches in diameter. They are among the finest flowering plants for greenhouse and window decoration, as well as for summer bedding. Being easy of cultivation they should be in every collection. Begonias should be kept cool and shaded. Do not try to force them, as they are apt to become long and "spindling." They should be watered sparingly at first, but once well started, give plenty of water and When done blooming dry off and store away, in the same manner as Dahlias or other bulbous roots.

SINGLE-FLOWERING DAHLIAS.

In this class of Dahlias the range of color is wide. They are very effective in shrubberies and borders, and the flowers are most desirable for bouquets and cutting for house decoration.

They can also be raised very successfully from seed, which should be sown the end of March, in a warm place. As soon as possible, transplant the seedlings and keep in a rather cool place till planted out where they are to flower.

We have upwards of 250 varieties but enumerate only twenty sorts, which we consider the best and most effective.

Aurora (Seedling No. 122). New. Very large clematis-shaped flowers; petals very dark crimson, with a pure white blotch in the center of each.

Alleghany. Flowers yellow, tinged with red, of medium size, very pretry and effective.

Amboy. Bright red, with perfect form; flowers very showy and attractive.

Buffalo. Resutiful symmetrical flowers of a bright and are seen as a bright and a structive.

GLADIOLUS.

THIS grand family of autumn flowering plants with their gorgeous and rich shades of color, profusion of bloom and elegance of habit, is entitled to a place in every garden. Their cultivation is very simple; they can be planted from the end of April until the middle of June, in any ordinary garden soil, from four to five inches deep, and produce beautiful spikes of lovely flowers until frost. The bulbs should be taken up after the frost has cut down the foliage.

Gloxinias.

LILIES.

Lilies are easily cultivated. The ground should be carefully dug and abundantly supplied with well-rotted manure, planting the bulbs six inches deep, after which they require very little care or attention, except to occasionally stir the soil and keep free of weeds. Plant as early in the spring as the ground can be worked.

THE GOLDEN-BANDED LILY OF JAPAN.

Lilium Auratum.

The most gorgeous of all Lilies; requires no special treatment when planted in the open at this season of the year, and if left undisturbed is perfectly hardy, flowering each summer in greater profusion. Deliciously fragrant.

Large bulbs, 7 to 9 inches in circumference, will produce from

8 to 10 flowers. 15 cts each: \$1.50 per doz.

Extra large bulbs, 9 to 11 inches in circumference, will produce from 12 to 18 flowers. 20 cts. each; \$2.00 per doz.

LILIUM SPECIOSUM RUBRUM.

Dark Red Japan Lance Lily.

White, thickly studded with dark crimson spots; very fine. The best of the Speciosum class.

Large bulbs, 7 to 9 inches in circumference. 15 cts. each: \$1.50 per doz.

Extra large bulbs, 9 to 11 inches in circumference. 25 cts. each; \$2.50 per doz.

LILIUM SPECIOSUM ALBUM.

Pure White Japan Lance Lily.

Large white flowers of good substance, with a greenish band running through each petal; one of the finest Lilies in cultivation.

Large bulbs, 7 to 9 inches in circumference. 20 cts. each; \$2.00 per doz.

Extra large bulbs, 9 to 11 inches in circumference. each; \$3.00 per doz.

CINNAMON VINE.

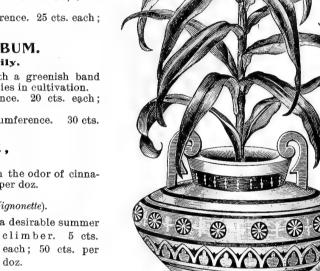

or the Chinese Yam.

Fine for trellis work. Name is derived from the odor of cinnamon emitted by the flowers. 10 cts. each; \$1.00 per doz.

LILIUM TIGRINUM SPLENDENS.

Much larger than the type, often bearing as many as 25 flowers on a stem. 15 cts. each; \$1.50 per doz.

TUBEROSES, "Excelsior Pearl."

This beautiful flower is too general a favorite to require a lenghty description. We annually dispose of about half a million bulbs, the demand growing more and more each year. The pearly white, fragrant double flowers are borne in great profusion on spikes about two feet high, a great advantage over the old tall variety. The delightful odor from these handsome flowers is so strong that a single blossom will perfume a whole room. 5 cts. each; 50 cts. per doz.; \$3.00 per 100.

SUNSHINE" SUMMER-FLOWERING BULB COLLECTION.

TWENTY DISTINCTLY DIFFERENT VARIETIES

... NOVELTIES IN PLANTS...

Miss Lottie D. Berry.

NEW CHRYSANTHEMUMS

(Ready for delivery after March 1, 1897.)

OUR OWN INTRODUCTION.

MISS LOTTIE D. BERRY.—(Certificated under name of Garret A. Hobart.) Large pure white incurved Japanese; very full and double, borne on a good, strong, stiff stem well furnished with foliage up to the flower. Blooms in mid season, and is a first class keeper. Certificate Chrysanthemum Society of America, November 7, 1896. Our illustration shows the character and symmetry of the flower to perfection. 75 cts. each, \$7.50 per doz.

E. G. HILL & CO.'S INTRODUCTION.

GOLDEN TROPHY.—(Certificated under name of Golden Dawn.) This is a second early yellow, following Marion Henderson in time; height 2½ feet, with beautiful foliage quite up to the flower; color clear bright yellow. The flower is extremely full, incurving, with petals rather short but very durable. 75 cts. each, \$7.50 per doz.

JOHN N. MAY'S INTRODUCTIONS.

ELAINORA.—Deep pink, reverse clear rose; large, bold, handsome, incurved flower, with good stemand foliage; second early. Certificate Chrysanthemum Society of America. 35 cts. each, \$3.50 per doz.

ELVENA.—A beautiful soft silvery pink throughout, of a very pleasing shade; broad, incurved

petals; extra good stem and foliage. Season October 10th to 15th. The most valuable early pink to date and awarded Certificate by the Chrysanthemum Society of America. 50 cts. each, \$5 per doz.

EVANGELINE.—Pure white of Kioto form. The greatest novelty of the year and altogether one of the very best ever sent out. Five Certificates. 60 cts. each, \$6 per doz.

LEONIDAS.—Amaranth shaded maroon, very large, with straight, flat petals forming a bold and imposing flower. A very fine exhibition variety. Certificate Chrysanthemum Society of America. 35 cts. each, \$3.50 per doz.

LOANTIKA.—Bright, clear red, very early and large; flat petaled, reflexed, but very full; the best early of this color. Season October 10th to 15th. 35 cts. each, \$3.50 per doz.

SYMPHONIA.—A very beautiful shade of carmine pink; reverse soft silvery, incurved and very compact. Ivory form of medium size. A fine bench variety, 18 to 24 inches high. 50 cts. each, \$5 per doz.

NATHAN SMITH & SON'S INTRODUCTIONS.

CHITO.—A good back row flower for exhibition collections. Strap petal, yellow ground, with fine red stripes, giving it a bronzy appearance. Certificated.

MERULA.—A dwarf semi-early pink, 3 feet in height. Very double, light pink flowers, 5 inches in diameter and nearly as deep. Certificated.

MIDGE.—Very dwarf, 18 to 24 inches in height. Flowers early, double, pure white, on very short stems; larger than Mme. F. Bergmann, but resembling that variety. Certificated.

MRS. JOHN J. GLESSNER.—A light yellow, very distinct in form; broad petals, opening in a whirl, which, when matured, assume a convexed form. The tips, turning backward and twisting in all directions, give a very irregular outline. Flower a perfect ball. Certificated.

Rudbeckia triloba

Golden Glow.

MRS. MARTIN A. RYERSON.—A pure white, with narrow petals. From crown buds it is reflexed, and from terminal buds the center builds up with interlacing, incurving petals, making a very high flower, distinct in form. Certificated.

SUNSTONE —Petals hook up at the end, showing the light straw reverse; upper surface bright yellow, shading to red at the base. The flower being flat, shows the three colors to advantage, making the most beautiful combination yet produced. Certificated.

WESTERN KING.—Incurved, with outer petals slightly reflexing. Pure white, growing $3\frac{1}{2}$ to 4 feet high, maturing November 1st. Stem and foliage excellent. Certificated. Price, 75 cents each, \$7.50 per dozen.

NEW DOUBLE! RUDBECKIA. "Rudbleckia Triloba Golden Glow."

One of the finest novelties in hardy plants introduced in recent years, and one that should be represented in every collection. Of fine habit and vigorous growth, producing a profusion of showy, very double, rich golden yellow flowers throughout midsummer. Excellent for cut flower purposes on account of the long stems, which often carry a dozen flowers furnished with beautiful foliage. Height 6 to 7 feet. 25 cts. each, \$2.50 per doz.

NEW ROSE. "Souvenir du President Carnot."

The sensation of the season, winning the highest honors wherever shown. Ivory white, shading to a beautiful flesh pink in the center. A fine, bold flower, very large, of exquisite form, with long stiffstem and handsome foliage. The strongest imaginable

grower, very free flowering, and altogether one of the finest Roses ever introduced. Equally good for winter forcing, or for planting outdoors in summer. 50 cts. each, \$5 per doz.

NEW MARGUERITE.—"Giant Pearl."

This new variety is superior in size and habit to any in cultivation. It is truly a giant in size, the individual flowers often measuring three inches and over in diameter. The snowy white petals are arranged in two rows around a dazzling yellow center, and are of good substance. Habit of the plant is very compact, being much more symmetrical in growth than some of the older varieties now in cultivation. The introducer writes that he has in his garden every variety of Marguerite in cultivation, but none of them approach in size or beauty the Giant Pearl. 50 cts. each, \$5 per doz.

NEW ROSE. "Yellow Rambler Aglaia."

In this variety we have all that can be desired in a Climbing Rose—hardiness, fragrance, free blooming and lasting qualities, and the much looked for yellow color. In habit of growth it is very vigorous, well established plants often making shoots 8 to 10 feet high in a season. Perfectly hardy, producing in great profusion pure yellow, sweetly scented flowers that last three to four weeks without fading. Flowers are borne in immense clusters, after the same manner as Crimson Rambler though a little later, and a large bush in full bloom is one of the most beautiful sights imaginable. 75 cts. each, \$7.50 per doz.

New Rose, "Yellow Rambler Aglaia."

NEW CARNATIONS.

- FLORA HILL.—The largest pure white Carnation yet produced. A very clean and healthy grower, with foliage of medium weight; calyx strong, stem long and moderately stiff. A most profuse and continuous bloomer. Certificate by the American Carnation Society, February, 1896. 25 cts. each, \$2.50 per doz.
- MRS. McBURNEY.—A strong, healthy grower, with long, stiff stems. Flower of extra size, very heavy and wax-like in texture, of a soft, clear salmon color. Apparently rust proof. Certificate by the American Carnation Society, February, 1896. 25 cts. each, \$2.50 per doz.
- LILY DEAN.—A very large, bold, handsome flower, pure white ground with very delicate margin and penciling of clear pink, making it exceedingly beautiful and attractive. One of the very freest blooming varieties known. Should be grown in a temperature of not over 50 degrees at night, otherwise the very large flower is too heavy for the stem. The plant is a strong, vigorous grower, and has been certificated wherever shown. 25 cts. each, \$2.50 per doz.
- MAUD DEAN.—Delicate blush white, gradually deepening to the center, making it the most distinctly beautiful and attractive flower ever sent out; it is also one of the most delightfully fragrant Carnations known. Its keeping qualities are remarkable; an extra well built flower, with good stiff stem which always carries it erect, making it an ideal flower. Certificate from the American Carnation Society, and many others. 25 cts. each, \$2.50 per doz.

COREOPSIS LANCEOLATA GRANDIFLORA "Harvest Moon."

Coreopsis lanceolata grandiflora "Harvest Moon."

This beautiful new introduction is a very much improved form over the popular C. lanceolata. It is of very strong growth and compact habit; bears sprays of large, beautiful flowers of a rich golden yellow in greater profusion than the old variety; and should find a place in every collection whether large or small. The cut gives only a faint idea of its beauty. Good, strong plants. 25 cts. each, \$2.50 per doz.

HELICONIA ILLUSTRIS RUBRICAULIS

The most striking and magnificently colored foliage plant ever introduced. The leaf stalks are bright vermilion, leaf blades rosy red, the venation being a combination of coloring in many hues of crimson lake, vermilion rose and yellow, evenly and exquisitely distributed. \$3 each.

GEONOMA ACAULIS.

A fine, dwarf growing stove Palm, of compact, graceful habit. The young leaves are a rich, bright pink, contrasting beautifully with the dark green, glossy older ones, which are but partially divided pinnæ. Awarded a medal by the Massachusetts Horticultural Society. \$10 each.

ANTHURIUM CRYSTALLINUM VARIEGATUM.

A remarkable sport from A. crystallinum, with the same fine growth and habit, and leaves similar in shape but profusely splashed with rich, creamy white. A great acquisition to any collection. \$5 each.

PANDANUS BAPTISTII.

The leaves of this variety are spineless and gracefully arching on all sides, measuring from 15 to 25 inches in length by an inch broad. They have a broad depression along the median line, and taper to a long acuminate point. The color of the leaves is a glaucous green, sometimes marked with from one to four milk white, longitudinal lines. \$1.50 each.

BEGONIA SPECULATA.

This is a variety of the Begonia Rex section, being a strong, vigorous grower and having very attractive foliage. The leaves are finely serrated, and mottled with numerous silvery white spots on an olive green background, making a very striking contrast. 50 cts. each.

HARDY ORNAMENTALS.

A select list of the best Hardy Perennial Plants and Deciduous and Evergreen Trees and Shrubs for use in Landscape Gardening.

Hardy Flowering Plants.

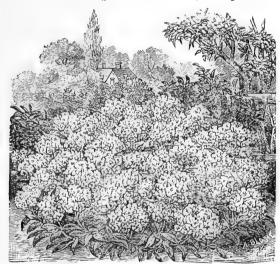

By this term is meant such plants as may be allowed to remain permanently in the open ground, whose foliage dies down to or near the ground each autumn, coming forth again with renewed vigor the following spring.

Hardy Flowering Plants may be set out either in fall or spring, in mixed borders or along boundaries of walks. Those of dwarf habit should be planted in front, and the taller sorts in sequence, the last lines being composed of such sorts as Hollyhocks, Sunflowers, and the taller growing Lilies, intermixed with spring flowering shrubs. With a slight knowledge of plants and their requirements, varieties may be selected to suit any conditions of soil—wet, dry, sunny or shady—there are plants for all.

Correspondence solicited from persons laying out extensive places, and special prices furnished on large quantities of any varieties desired.

ACHILLEA (Yarrow).

serrata plena "The Pearl." Flowers of the purest white, double, in appearance somewhat resembling a Pompon Chrysanthemum; few flowered clusters on stems 1 to 2 feet high. One of the very best white flowered plants for the border or for cut flowers. Does best in rich soil. June to August. 15 cts. each, \$1.50 per doz.

Achillea "The Pearl."

AGROSTEMMA (Rose Campion).

coronaria. "Rose Campion." Flowers dark crimson, in great abundance, on one-flowered peduncles. Leaves leathery, woolly, mullein-like; blooms all summer. Height 1 to 2 feet. 15 cts. each, \$1.50 per doz.

coronaria alba. A variety with pure white flowers. 20 cts. each, \$2 per doz.

ALTHAEA (Marsh Mallow).

fosea. "Hollyhock" This well known, old fashioned garden flower hardly needs a word of description. It is worthy of a place in any garden, and its tall spikes of flowers are among the most conspicuous in the border in the autumn. Of late years the varieties have been much improved until now they may be had in all colors from pure white through all shades of pink, yellow, lavender, crimson, magenta to almost black, and both single and full double. Height 5 to 8 feet. Late summer.

Single. A great variety of colors, including pure white, yellow and red. 20 cts. each, \$2 per doz.

Double. Containing all the best varieties, including white, pink, red and yellow. 20 cts. each. \$2 per doz.

ALYSSUM (Madwort).

saxatile compactum. An easy growing plant of dwarf, compact habit, with yellow flowers. One of the nicest of all spring blooming plants for the rockery, and for the edge of a border. Height 1 foot. April and May. 20 cts. each, \$2 per doz.

ANEMONE (Wind Flower).

japonica alba. Large white flowers with yellow center; very floriferous and perhaps the very best white autumn flowering plant in cultivation. Height 2 feet. September and October. 15 cts. each, \$1.50 per doz.

japonica elegans. Deep rose; semi-double; fine. 15 cts. each, \$1.50 per doz.

japonica rosea. Pale rose color. 15 ets. each, \$1.50 per

Anemone japonica Whirlwind.

japonica Whirlwind. A grand variety of recent introduction. Flowers white, semi-double, 2½ to 3 inches in diameter; of sturdy habit, and much freer flowering than A. japonica alba. 20 cts. each, \$2 per doz.

sylvestris. "Snowdrop Wind Flower." Flowers glistening white, 1½ inches across, oblong pedicles. Height 6 to 18 inches. April to July. A very pleasing plant for a shady situation. 20 cts. each, \$2 per doz.

ANTHEMIS (Chamomile).

tinctoria. "Yellow Chamomile." Flowers bright yellow, 1 to 2 inches across. Foliage downy beneath. Height 12 to 18 inches. July to November. 10 cts. each, \$1 per doz.

Aquilegia.

AQUILEGIA (Columbine).

cærulea. "Rocky Mountain Columbine." Flowers blue and white, sometimes tinted with scarlet, $2\frac{1}{2}$ to 3 inches in

diameter, 2 inches long. Height 10 to 15 inches. May and June. 20 cts. each, \$2 per doz. chrysantha. "Golden Columbine." Flowers bright primrose yellow, the spreading limb of the petals darker; spur slender, 2 inches long; stems many flowered. Height 2 to 3 feet. June to August. One of the finest plants in existence for the hardy border. 20 cts. each, \$2 per doz.

vulgaris alba. Flowers white, and much used for cutting

purposes. 20 cts. each, \$2 per doz.

ed hybrids. Including the best hybrids and species. 15 cts. each, \$1.50 per (loz. Mixed hybrids.

ARMERIA (Sea Pink).

plantaginea. Flowers bright rose, on tall scapes. Height 1 foot. June to August. 20 cts. each, \$2 per doz.

ASCLEPIAS (Swallow-Wort).

"Butterfly Plant." Flowers bright orange red, in tuberosa. a large terminal corycomb. Foliage very hairy. Height 1 to 2 feet. July to September. This is the most brilliantly colored of all our native flowers, and no more vivid orange red can be found in flowering plants. The plant deserves a place in every garden, as the flowers last a long time in perfection and the plant is of the easiest culture when once established. 15 cts. each, \$1.50 per doz.

ASTER (Michaelmas Daisy).

novæ-angliæ. Flowers large, purple with orange centers, in large terminal clusters. Height 4 to 5 feet. Our finest species, of a tall and robust habit and admirably adapted for the tall border. 20 cts. each, \$2 per doz.

novæ-belgii Lady Trevellyn. A form giving immense large heads of pure white flowers, with yellow centers. The panicles are often 18 inches tall and a foot through, 20

cts. each, \$2 per doz.

 paniculatus simplex. Flowers light blue. Stem much branched. Height 3 to 4 feet. 20 cts. each, \$2 per doz.
 puniceus. Flowers blue, about an inch across. Whole plant very rough and hairy; stems reddish. 3 to 6 feet high.

20 cts. each, \$2 per doz. surculosus. Flowers violet, an inch or more across, one to several on a spike. Height 1 foot. 20 cts. each, \$2 per doz.

BELLIS (Daisy).

perennis. "English Daisy." The daisy of Wordsworth and other English poets. Flowers white, pink or red, double or single. The double, button-like forms are especially fine. Height 3 to 4 inches. June. 10 cts. each, \$1 per doz.

BOLTONIA.

asteroides. A rare and beautiful native species. Flowers white with a yellow center, an inch or more in diameter, produced in great abundance. Height 5 to 6 feet. August and September. 20 cts. each, \$2 per doz.

latisquamæ. "False Chamomile." Flowers lavender purple, of good size, produced in great abundance. Height 4 feet. August and September. 20 cts. each, \$2 per doz.

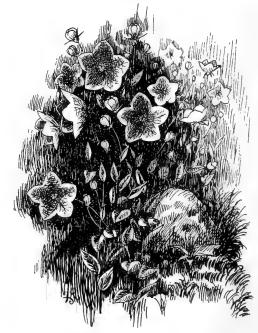

CAMPANULA (Hare-Bell).

carpathica. Flowers blue, flaring, bell shaped, on long June to August. A desirable species for a low border, the flowers being produced all summer. Height 1 foot. 15 cts. each, \$1.50 per doz.

grandiflora. "Chinese Bell Flower." Flowers deep slaty blue, very large, 3 to 4 inches across when fully expanded, balloon shaped before opening; produced in such profusion as to almost cover the plant. One of the very best Campanulas, and one of the best blue summer flowering plants. Height $1\frac{1}{2}$ feet. July and August. 15 cts. each, \$1.50 per doz.

Mariesi. A grand dwarf variety, resembling C. grandiflora but of much dwarfer habit. Flowers large, bell shaped, produced very freely. Height 1 foot. June to September. 20 cts. each, \$2 per doz.

persicæfolia. Flowers large, bell shaped, flaring, pale blue, in a somewhat one-sided raceme. Height 1 to 3 feet. July. This and its various varieties are among the most useful species either for the border or for cut flowers. 20 cts. each, \$2 per doz.

Campanula grandiflora.

persicæfolia alba. Pure white form of the preceding. 20 cts. each, \$2 per doz.

persicæfolia alba plena. Double white flowers. A fine plant for cut flowers, or it may be forced into bloom early in the season. 25 cts. each, \$2.50 per doz.

CONVALLARIA (Lily-of-the-Valley).

majalis. "Lily-of-the-Valley." Flowers pure white, bell shaped, in an arching raceme; foliage light green. Height 6 to 12 inches. May and June. This plant is easy to force, and may be had in bloom at almost any time of the year. 25 cts. each, \$2.50 per doz.

COREOPSIS (Tickseed).

delphinifolia. Flowers yellow with a brownish center; foliage finely divided and appearing as if whorled. Height 1 to 3 feet. July. A useful species. 20 cts. each, \$2 per

lanceolata. Flowers large, $1\frac{1}{2}$ to 2 inches across, bright golden yellow, produced in the most prodigal profusion, covering the plants with bloom from June until late September. They are borne on long, wiry stems, fitting them admirably for cutting, and they will last for many days in water. Height 1 to 3 from of the finest of hardy plants and cannot be too strongly recommended. 15 cts. each, \$1.50 per doz.

Coreopsis lanceolata.

DELPHINIUM (Larkspur).

formosum. Flowers rich dark blue, shaded with purple and with a white eye, in long spikes. Foliage with a greyish tinge. Height $1\frac{1}{2}$ to 2 feet. All summer. 20 cts. each, \$2 per doz.

hybridum. "Bee Larkspur." Dark or light blue. 3 to 4 feet. All summer. 20 cts. each, \$2 per doz.

sinense. Mixed colors. This variety comes in shades of dark blue, light blue, and pure white. 15 cts. each, \$1.50 per doz.

DIANTHUS (Pink).

Dianthus plumarius plenus.

barbatus. "Sweet William." Flowers very variable in color, being in all shades of red and pink, variously marked and splashed with white. Individual flowers about an inch across. Height 1 to 1½ feet. Summer. An old fashioned but useful flower, valuable for cutting, the crowded corymbs being produced in great abundance. 10 cts. each, \$1 per doz.

Her Majesty. The flowers of this variety are very large, similar to a Carnation, of the purest white, and very fragrant; borne on stout, erect stems, 12 inches long. It is perfectly hardy, and will winter in the open border

without protection, or may be grown in cold frames for early forcing. 15 cts. each, \$1.50 per doz.

Mrs. Sinkins. "Hardy Carnation." Large, pure white, double, fragrant. Spring. 15 ets. each, \$1.50 per doz.

plumarius pienus. "Double Pheasant's Eye." Rose colored and very fragrant. Spring. 15 ets. each, \$1.50 per doz.

plumarius albus plenus. Double white form; very fragrant. 15 cts. each, \$1.50 per doz.

DICENTRA (Dielytra).

spectabilis. "Bleeding Heart." Flowers heart shaped, an inch long, in long, drooping, rose crimson racemes. Leaves coarsely divided or sharp lobed. Height 1 to 2 feet. May to August. One of the most useful of border plants, its bright colored, interesting flowers being produced all summer and in great profusion. 15 cts. each, \$1.50 per doz.

DIGITALIS (Foxglove).

gloxinoides. "Foxglove." Large tubular flowers, purple, in tall spikes; for shrubbery. Early summer. In variety. 15 cts. each, \$1.50 per doz.

ECHINACEA.

purpurea. Flowers purple, fading at the tips of the ray florets to greyish green, 4 inches across. Height 2 to 4 feet. June to August. A desirable plant. 20 cts. each, \$2 per doz.

EUPHORBIA (Spurge).

corollata. "Flowering Spurge." Flowers small and inconspicuous, but surrounded by an involucre of five white bracts which appear like petals. The flowers are produced in great abundance at the summit of the many branched stems, and are excellent for cutting Height 2 to 3 feet. July to October. A good border plant. 15 ets. each, \$1.50 per doz. (See illustration page 40.)

Delphinium sinense.

FUNKIA (Day Lily).

cordata variegata. Handsome plant, with broad leaves, often banded with white; bears pretty blue or white flowers of good size, in spikes; very fragrant. Height 2 feet. June and July. 15 cts. each, \$1.50 per doz. (See illustration page 40.)

grandiflora. Flowers pure white, 3 to 4 inches long, in a 12 to 15 flowered raceme. Leaves heart shaped, with strongly incurving edges, 1 to 2 feet long. Height 2 feet. All summer. 35 cts, each, \$3.50 per doz.

FUNKIA-Continued.

undulata variegata. The very finest of the Funkias. It has ovate spatulate leaves, the margins deep green and center a beautiful creamy white, making it very attractive for the border, as it keeps its color the entire summer. Towards the latter part of the season it produces long spikes of beautiful, light blue flowers. Height 6 inches. June and July. 20 cts. each, \$2 per doz.

Euphorbia corollata.—See page 39.

GAILLARDIA (Blanket Flower).

grandiflora. This is without exception one of the finest herbaceous plants extant. Its everblooming qualities render it most distinct and valuable. The plants grow from 1 to $1\frac{1}{2}$ feet high, bearing handsome and showy flowers 3 to 4 inches across, golden yellow, with a bright ring of crimson round the center of the petals, and continue in flower from early summer until snow. For cutting purposes it is unexcelled. 15 cts. each, \$1.50 per doz.

GYPSOPHILA.

paniculata. "Baby's Breath." Flowers very small, white, in a very many flowered panicle, and produced in such abundance that in a good specimen the plant will be covered entirely with the mist-like flowers. Height 2 to 3 feet. June to August. A grand plant for cut flowers. 20 cts. each, \$2 per doz.

Funkia cordata variegata.-See page 39.

HELENIUM (Sneezewort).

autumnale. "Sneeze Weed." Flowers bright lemon yellow, in a very large flat paniele. Height 3 to 6 feet. August.
A grand and conspicuous plant. 20 cts. each, \$2 per doz.

HELIANTHUS (Sunflower).

decapetalus multiflorus anemonæflorus. A fine variety with long ray florets, giving the flower a likeness to an Anemone. A fine plant for growing for cutting. 20 cts. each, \$2 per doz.

decapetalus multiflorus grandiplenus. One of the very best species of the hardy Sunflower type, having double Dahlia-like flowers of a bright yellow color. Very free flowering and useful for cutting purposes. 15 cts. each, \$1.50 per doz.

Helianthus.

doronicoides. This is a species with leaves often a foot long, and is thought to be the original of the Jerusalem Artichoke of gardens. Flowers bright yellow. Height 5 to 9 feet. July and August. 15 cts. each, \$1.50 per doz.

Maximilianus. Flowers bright yellow, produced in great profusion. One of the last flowers to bloom in autumn; a robust growing and free flowering species, invaluable for cutting. Height 6 to 8 feet. September to November. 15 cts. each, \$1.50 per doz.

mollis grandiflorus. Produces in early fall, large, well shaped, bright yellow flowers. Height 4 feet. 15 cts. each, \$1.50 per doz.

orgyalis. Flowers yellow, small, in a large panicle. Leaves long and narrow, very numerous. Height 6 to 10 feet. August and September. A very useful species of graceful habit. 20 cts. each, \$2 per doz.

HELIOPSIS (Ox-Eye)

Pitcheriana This is a perpetual bloomer, with deep golden yellow flowers about 2 inches in diameter. Habit compact and bushy. Height 2 to 3 feet. No collection of hardy plants should be without this variety, which will give for a long time a most effective show in the border. Also very useful for cutting on account of the length of time the flowers keep fresh. 15 cts. each, \$1.50 per doz.

Heliopsis Pitcheriana.

HELLEBORUS (Hellebore).

riger. "Christmas Rose." This is a general favorite. Flowers pure white, 2 to 4 inches across. Foliage persistent. By growing under glass, or protecting even with a cold frame only, they will flower in mid-winter. Height 6 to 18 inches. 25 cts. each, \$2.50 per doz.

HEMEROCALLIS (Day Lily).

flava. Flowers bright golden yellow, sweet scented. Height 2 to 3 feet. June and July. 15 cts. each, \$1.50 per doz.

Kwanso plena. A variety of the common Day Lily, with large double flowers of a rich bronze orange color. 15 cts. each, \$1.50 per doz.

Middendorfii. Flowers deep golden yellow, with several flowers in a head. Height 1½ to 2 feet July and August. A desirable species for cutting. 15 cts. each, \$1.50 per doz.

Thunbergii. Flowers bright golden yellow, very fragrant. Height 3 to 4 feet. August and September. This differs from H. flava in being later to come into bloom. One of the most desirable species. 15 cts. each, \$1.50 doz.

HEUCHERA (Alum Root).

sanguinea. This is one of the finest additions to our hardy plants, as it flowers profusely the entire summer and can also be forced under glass during the winter months. The bright crimson flowers are borne in long, drooping arching sprays for weeks in succession, and are excellent for cutting purposes. Height 18 inches. June to September. 20 cts. each, \$2 per doz.

HIBISCUS (Rose Mallow).

Crimson Eye. A beautiful variety, with large, pure white flowers, having a large spot of deep, velvety crimson in the center. Fine. 15 cts. each, \$1.50 doz. (See illustration on page 42.)

incanus. Flowers white, 5 inches across; for tall borders. 15 cts. each, \$1.50 per doz.

Moscheutos. "Swamp Rose Mallow." Flowers 4 to 5 inches in diameter, pale rose color or white, usually with a crimson eye. Height 3 to 4 feet. August_and September. 15 cts. each, \$1.50 per doz.

HYPERICUM (St. John's Wort).

Moserianum. This plant is of a shrubby nature, and covered with handsome foliage. During the summer and fall, until frost comes, it is literally covered with a profusion of glittering, golden, satin-like flowers, which are from 2 to 3 inches in diameter. This is one of the most striking additions to the family of hardy plants made in recent years, and should be represented in every garden whether large or small. Height 2 to 3 feet. 20 cts. each, \$2 per doz.

IBERIS (Candytuft).

correæfolia. Flowers white, in at first flat topped clusters which in growth elongate. Height 9 to 12 inches. May and June. A hybrid variety and the best of the evergreen Candytufts, being admirable for edgings or the front of the border. 20 cts. each, \$2 per doz.

saxatilis. Flowers small, white, in corymbs. # Height 3 to 6 inches. May to July. A common and very useful dwarf growing species. 20 cts. each, \$2 per doz.

semperflorens. Flowers white, sweet scented, larger than most kinds. Height 1 to 2 feet. Early spring and late autumn. 20 cts. each, \$2 per doz.

IRIS (Rainbow Flower).

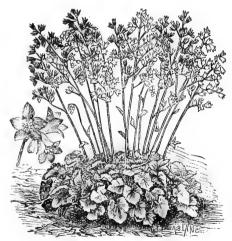

amœna. Deep lilac purple, beautifully marked with white and yellow. Very pleasing. June. 10 cts. each, \$1 per doz.

nudicaulis. A fine variety with bright violet purple flowers; spathe two-flowered. April. 15 cts. each, \$1.50 per doz.

pallida Dalmatica. Lavender purple flowers. Very fine form. 15 cts. each, \$1.50 per doz.

Pseudo-acorus variegata. Flowers golden yellow; foliage striped with white. 15 cts. each, \$1.50 per doz.

sibirica sanguinea. Large, purple flowers, veined white. 15 cts. each, \$1.50 per doz.

Heuchera sanguinea.

IRIS GERMANICA (German Iris).

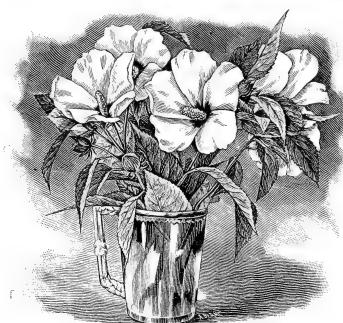

This section includes the European varieties with large, bright glaucous foliage and large flowers, generally 3 to 4 on a stem, and 12 to 15 inches in height. [They include nearly all the colors obtainable in a flower, and should be in every collection. May and June. (See illustration on page 42.)

L'Innocence. Flowers white, slightly tinged with purple and orange. 15 cts. each, \$1.50 per doz.

Madame Chereau. A grand feathery white variety, with fine violet edges. 15 cts. each, \$1.50 per doz.

IRIS KAEMPFERI (Japan Iris).

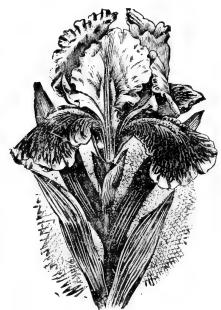

This section includes varieties from Japan, with bright green foliage and flowers of almost every shade of color. They require a moist situation, where they will grow 2 to 3 feet in height. June and July. Single and double, in variety. 25 cts. each, \$2.50 per doz.

Hibiscus Crimson Eye. - See page 41.

LATHYRUS (Everlasting Pea).

latifolius. "Everlasting Pea." Flowers rose colored, large, on many flowered stems, similar to the annual Sweet Pea. July to September. Both this and the next are very suitable for training over a trellis, and the flowers are very useful for cutting as they are produced in great abundance. 20 cts. each, \$2 per doz.

Iris germanica.—See page 41.

latifolius albus. A variety of the preceding, with white flowers. A very desirable plant. 20 cts. each, \$2 per doz.

LEPACHYS.

pinnata. Flowers large, light yellow, the ray florets much drooping. Leaves pinnate. Height 3 feet. July.
20 cts. each, \$2 per doz.

LIATRIS (Blazing Star).

scariosa. Flower heads an inch across, bright purple, in a tall spike. Height 2 to 5 feet. Late summer. 15 cts. each, \$1.50 per doz.

spicata. "Blazing Star." Flowers purple, about an inch across, in a tall, many flowered, compact spike. Height 2 to 5 feet. This species delights in a moist, sunny situation. 15 cts. each, \$1.50 per doz.

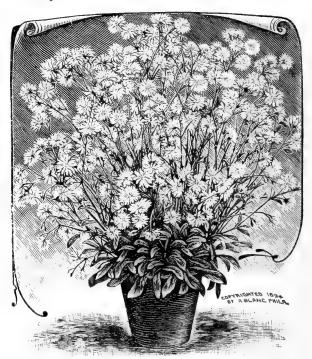

LOBELIA.

cardinalis. "Cardinal Flower." Flowers intense red, opening from below upwards along the tall spike, thus bearing flowers for several weeks. Perhaps the most brightly colored of all our native plants, and deserving of general culture, as it will adapt itself to almost any condition. Height 2 to 4 feet. July and August. 15 cts. each, \$1.50 per doz.

LYCHNIS (Rose Campion).

chalcedonica. Flowers bright scarlet, in dense clusters. Height 2 to 3 feet. June to August. An old and good border plant, among the most brilliant of hardy border plants. 15 cts. each, \$1.50 per doz.

Flos-cuculi plenissima semperflorens. Decidedly the best hardy plant of its class that has been introduced for years. Succeeds admirably in almost all situations, blooming constantly so that sprays can be cut for bouquets any time. Flowers delicate rose, borne in exquisite sprays all over the plant from early spring until frost. Height 12 to 15 inches. 15 cts. each, \$1.50 per doz.

Lychnis Flos-cuculi.

Viscaria splendens. A fine variety with bright crimson flowers of a showy and superior type. Height 12 inches. May and June. 15 cts. each, \$1.50 per doz.

MONARDA (Horse Mint).

didyma. "Oswego Tea." Flowers bright red, in compact heads, surrounded by bracts which are tinged red outside. Height 2 feet. July and August. One of the most showy and useful border plants. 15 cts. each, \$1.50 per doz.

fistulosa. "Wild Bergamot." Flowers purple, the bracts also tinged with color, smaller than the preceding. Height 2 to 5 feet. July to September. 15 cts. each, \$1.50 per doz.

MYOSOTIS (Forget-Me-Not).

palustris semperflorens. This variety is superior to the type in that it blooms all summer. Flowers large, with good stems, and fine for cutting. Very choice, and well adapted for the border or rockery. 15 cts. each, \$1.50 per doz.

OENOTHERA (Evening Primrose).

fruticosa major. A large flowered form of O. fruticosa. A fine plant for massing in shrubbery, its bright flowers being produced in great profusion for three months. Height 2 feet. June to September. 20 cts. each, \$2 per doz.

PAEONIA (Paony).

Double, in separate colors. Crimson lake, crimson, crimson red, rose, dark rose, light rose, light rose with blush center, very dark rose (extra large), silvery pink, dark red, pure white. 35 cts. and 50 cts. each, \$3.50 and \$5 per doz.

Assorted Varieties. Double, good colors. 25 ets. each, \$2.50 per doz.

Assorted Varieties. Single, good colors. 25 ets. each, \$2.50 per doz.

officinalis fl. pl. The old fashioned dark crimson variety; double. 25 cts. each, \$2.50 per doz.

arborea. "Tree Pæony." These species, natives of Japan, are a grand addition to a garden; they do not die down to the ground like the herbaceous sorts, but make fine bushes 3 to 4 feet in height covered in spring with immense flowers, and present an elegant appearance. Assorted varieties, embracing all colors, good, strong plants. 75 ets. each, \$7.50 per doz.

PAPAVER (Poppy).

bracteatum. A fine form of P. orientale, with very large red flowers, each subtended by a bract. Flowers often measure 8 inches across. Height 3 to 4 feet. 15 cts. each, \$1.50 per doz.

nudicaule. Flowers similar to P. alpinum, but occurring in three pronounced and distinct colors, white, bright orange and yellow. A close, dense grower, very graceful and excellent for edgings. Spring and more sparingly again in the autumn. Height 1 to 1½ feet. 15 cts. each, \$1.50 per doz.

orientale. "Oriental Poppy." Flowers 6 to 8 inches across, deep scarlet, with a black purple spot at the base of each petal. Early summer. Height 2 to 4 feet. This and its varieties are perhaps the showiest of hardy plants. They are of easiest culture, and, when established, keep on blooming profusely year after year. The leaves die down immediately after flowering, but new ones appear in early fall and endure through the winter. 15 cts. each, \$1.50 per doz.

PENTSTEMON (Beard-Tongue).

barbatus Torreyi. A variety superior to the type, the flowers being deep scarlet; grows in tall clumps 3 feet high. July. 20 cts. each, \$2 per doz.

diffusus. Flowers less slender than the preceding, but not so long; bright purple, showy, in more or less leafy panicles. Height 1½ to 2 feet. August and September. 20 cts. each, \$2 per doz.

lævigatus Digitalis. Flowers white, tube shaped and borne in great profusion. Unusually fine for cutting. Height 3 feet. July and August. 20 ets. each, \$2 per doz.

PHLOX.

amœna. Of dwarf habit; flowers purple or pink, in compact corymbs, in late spring. An elegant plant for the front of a mixed border. 10 ets. each, \$1 per doz.

Carolina. Flowers reddish purple, in rather small, terminal clusters. Late spring. Height 1 to 1½ feet. 10 cts. each, \$1 per doz.

subulata. "Ground or Moss Pink." Very dwarf, with moss-like foliage and pink flowers. Succeeds where grass would not. April and May. 10 cts. each, \$1 per doz.

Oriental Poppy.

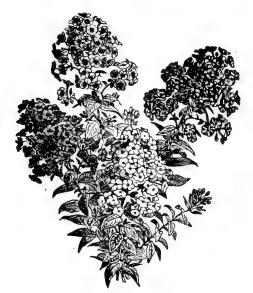

subulata alba. A beautiful white form. 10 cts. each, \$1 per doz.

PHLOX PANICULATA VARIETIES.

Amazon. Fine white; large flowers.

Bell Helydone. Geranium pink, with rose red eye.

Blush. White, with tinge of lilac; tube of corolla rose-purple.

Phlox paniculata.

Croix de Worms. Flowers made up of ten equal sections, white and lavender alternating.

Eugene Daurenvillier. Very large flower; pure, clear rose purple, with large white eye. Very fine variety.

Iris. Very large flowers; Aster purple, with crimson eye. Very fine.

Jeanne d'Arc. White, with large rose red eye.

 $\textbf{J. H. Slocum.} \quad \textbf{Large flowers; deep rose pink with crimson}$ eve.

Larend. White, with broken radiating lines of solferino; sometimes light color, sometimes dark.

La Feu du Monde. Deep Geranium pink, crimson eye.

Michæl Buchner. Deep Aster purple. The nearest approach to crimson.

Mad. Selamac. Bright rose red, with crimson eye. Very large panicles.

Mad. P. Langier. Bright Geranium red, vermilion eye.

Pandre. White, flushed lilac, with large crimson eye.

Richard Walter. White, with large crimson eye.

The "Pearl." Flowers large, pure white; excellent for cutting, lasting better than any variety in cultivation.

15 cts. each, \$1.50 per doz.

PLUMBAGO (Leadwort).

Larpentæ. A beautiful, low growing plant, with intense blue flowers. Habit dwarf and spreading. Height 6 to 12 inches. Autumn. 15 cts. each, \$1.50 per doz.

PRIMULA (Primrose).

Sieboldii Lilacina. One of the very finest of the Primulas. This variety produces large heads of showy flowers of a rich lavender color, and are so bright that they can be seen at a long distance. Blooms in early spring when very few other flowers are in sight. Very useful for rockwork and borders. Height 8 to 10 inches. 15 cts. each, \$1.50 per doz.

PYRETHRUM (Feverfew).

uliginosum. "Giant Daisy." Flowers 2 inches across, white with yellow center. A most profuse bloomer and a showy subject when in flower. Height, 3 to 5 feet. Late summer and early autumn. 20 cts. each, \$2 per doz.

roseum. Double, named varieties. 25 cts. each, \$2.50 per doz.

roseum. Single, mixed. 20 cts. each, \$2 per doz.

RUDBECKIA. (Cone Flower).

Rudbeckia maxima.

maxima. Distinct; foliage bluish green; flowers large, with a tall cone-like center, and long drooping yellow petals. Height 5 to 6 feet. June to August. 20 cts. each, \$2 per doz.

speciosa. "Oxeye Daisy." A splendid plant, bearing orange yellow flowers, with dark purple disc, in the greatest profusion. Height 2 to 3½ feet. August to October. 15 cts. each, \$1.50 per doz.

triloha. A pretty free flowering plant with yellow flowers. Fine for the border. Height 2 to 5 feet. August. 15 cts. each, \$1.50 per doz.

SALVIA (Sage).

pratensis. One of the best blue flowered hardy plants, whether for the border or for cutting. Produces spikes of a splendid blue continuously from May to July. Height 2 to 3 feet. In variety, 15 ets. each, \$1.50 per doz.

SAPONARIA (Soapwort).

ocymoides. "Rock Soapwort." Nothing is more pleasing to the eye than to see a few stones or stumps of trees covered with this most handsome of trailing plants, bringing forth, as it does, a profusion of dainty, pink, starlike flowers. May to August. 15 cts. each, \$1.50 per doz.

SEDUM (Stonecrop).

Fabarium. Upright, with soft, rosy pink flowers. Height 10 to 18 inches. 15 cts. each, \$1.50 per doz.

spectabile. Large heads of pink flowers. A fine border plant, and one of the best for foliage or flower effect.
 Height 12 to 18 inches. August and September. 15 cts. each, \$1.50 per doz.

spectabile album. Similar to above, with white flowers. 15 cts. each, \$1.50 per doz.

SOLIDAGO (Golden Rod).

A large genus of perennial plants, natives of this country. Best suited for planting in shrubberies and borders, where their bright yellow blooms of nearly every shade form a very pleasing contrast. Of easiest culture in ordinary garden soils. Height 2 to $4\frac{1}{2}$ feet. July to October. In variety. 15 cts. each, \$1.50 per doz.

Spiræa japonica grandiflora.

SPIRAEA (Meadow-Sweet).

astilboides. "Coral Sprays." This type of Spiræa is handsome and distinct, and cannot be too highly appreciated as a decorative plant for out door planting. It is dwarfer and much more graceful than S. japonica. The flowers are produced in greatest profusion, on branching spikes terminated by elegant dense plumes of pure white, well displayed above the foliage. Perfectly hardy. 20 cts. each, \$2 per doz.

Filipendula plena. "Double Dropwort." A beautiful variety, dwarfer in habit than S. Filipendula, with pearly white flowers and fern-like foliage. Excellent for cutting purposes. June and July. 25 cts. each, \$2.50 per doz.

japonica grandiflora. Large and close bracts of pure white flowers. 20 cts. each, \$2 per doz.

Ulmaria plena. Handsome foliage and large panicles of double white flowers. 15 cts. each, \$1.50 per doz.

STATICE (Sea Lavender).

latifolia. Throws out during the summer months fine spikes covered with a profusion of small blue flowers, which are very showy and last a long time in bloom. Very useful for cutting purposes in connection with other flowers, as its feathery effect tends very much to lighten any stiff arrangement. Height 18 inches. 20 cts. each, \$2 per doz.

THERMOPSIS.

caroliniana. A fine plant for tall borders, with clover-like foliage and long spikes of bright yellow, pea shaped flowers. Height 5 feet. June to August. 20 cts. each, \$2 per doz.

TRITOMA (Flame Flower).

Uvaria. This is one of the most showy of the perennials, throwing out in the early fall months tall and handsome spikes of brilliant scarlet flowers. One good clump often throws out as many as 18 to 20 spikes at a single time, making the most gorgeous display imaginable. As an isolated specimen in the lawn, or in prominent places, it is unsurpassed owing to the brightness of its flower spikes. Height 3 feet. August and September. 25 cts. each, \$2.50 per doz.

VERONICA (Speedwell).

longifolia subsessilis. The choicest of the larger growing species of this class, with deep blue flowers produced in erect spikes a foot in length, each spike lasting a long time on the plant. Should be in every garden. August to October. 20 cts. each, \$2 per doz.

rupestris. A fine creeping form with showy spikes of handsome, dark blue flowers. May and June. 15 cts. each, \$1.50 per doz.

spicata Long spikes of bright blue flowers, the spikes lengthening with age and lasting for weeks. Splendid border plant. 20 cts. each, \$2 per doz.

VINCA (Periwinkle).

minor. Handsome evergreen foliage; showy, bright blue flowers, borne freely in early spring and at intervals throughout the summer and autumn. Fine for under trees and places where grass will not grow. 10 cts. each, \$1 per doz.

minor fol. aurea var. Foliage marked golden yellow. 15 cts. each, \$1.50 per doz.

VIOLA (Violet).

odorata. "Sweet English Violet." 10 cts. each, \$1 per doz.

odorata alba. White variety of the sweet scented English Violet. 10 cts. each, \$1 per doz.

odorata Marie Louise. Light blue, double. Generally used by Florists. 10 cts. each, \$1 per doz.

odorata The California. Large, single, violet purple flowers, intensely fragrant. 10 ets. each, †1 per doz.

odorata The Czar. Very dark blue, single; sweet scented. 10 cts. each, \$1 per doz.

YUCCA (Adam's Needle).

filamentosa. Very handsome for planting in the lawn. Leaves pointed and covered with terminal hairs; flowers white, on immense spikes, raised several feet above the foliage. June and July. 25 cts. each, \$2.50 per doz.

Hardy Climbers.

AKEBIA.

quinata. A climbing Japanese shrub with fine foliage and purple flowers; very handsome. 35 cts. each, \$3.50 per doz.

AMPELOPSIS.

Quinquefolia. "Virginia Creeper." A free growing climber known everywhere. The leaves turn vivid scarlet in autumn. 25 ets. each, \$2.50 per doz.

Veitchii. "Boston Ivy." This variety clings closely to walls by means of erial rootlets, forming dense sheets of green during summer and coloring to bright crimson in autumn. 25 cts. each, \$2.50 per doz.

ARISTOLOCHIA (Dutchman's Pipe).

Sipho. A rapid growing native vine, with large green leaves and curious flowers. 50 ets. to 75 ets.

CELASTRUS (Bittersweet).

scandens. A good trellis climber, having light green foliage and fruit in red, pendant arils that remain perfect and keep the plant bright nearly all winter. 25 ets. each, \$2.50 per doz.

CLEMATIS.

This is a royal family of climbers, covering the whole season with their blooming time, and showing wonderful diversity in the forms and colors of their flowers.

paniculata. A new Japanese species, with white sweet scented flowers in clusters, and beautiful glossy leaves.
It has become a great favorite on account of its beauty and rapid growth, and because it blooms profusely during the fall months when all other vines are flowerless.
35 cts. each, \$3.50 per doz.

JACKMANNI VARIETIES.

Our collection of these handsome large flowering varieties is unsurpassed, and comprises the choicest kinds in cultivation. Their brilliancy of color, rapid growth and robust habit render them invaluable as ornamental trellis plants. We offer a fine assortment in the best varieties at 50 cts.

EUONYMUS.

radicans. A very useful climber, clinging to walls or stumps like Ivy, with small shining green foliage, remaining in full leaf during winter. 20 cts. each, \$2 per doz.

radicans variegata. Similar to the preceding in habit of growth, but has beautiful green and golden foliage, changing in the winter to a pretty carmine crimson tint. 25 cts. each, \$2.50 per doz.

GLECHOMA.

hederacea fol. var. "Ground Ivy." Beautiful variegated creeper, with small, light green leaves, edged around with white. Much used for vases or edging beds, or for growing over banks and stones. 15 cts. each, \$1.50 per doz.

HEDERA (Ivy).

hibernica. "Irish Ivy." The variety most generally grown. 25 cts. each, \$2.50 per doz.

Helix digitata. Leaves very deeply cut, blackish green with white veins. 25 cts. each, \$2.50 per doz.

Helix variegata. A vigorous growing variety with variegated leaves. 35 cts. each, \$3.50 per doz.

LONICERA (Honeysuckle).

brachypoda. Yellow fragrant flowers. 25 cts. each, \$2.50 per doz.

brachypoda aureo-reticulata. "Japan Golden Honeysuckle." A very beautiful species; leaves netted with yellow. 25 cts. each, \$2.50 per doz.

Halleana. "Hall's Japan Honeysuckle." A vigorous grower with pure white flowers that change to yellow; very fragrant. 25 cts. each, \$2.50 per doz.

ROSES, CLIMBING.

See page 51.

TECOMA (Trumpet Vine).

Very hardy and luxuriant in growth; flowers large and showy, trumpet shaped, bright scarlet. 25 cts. each, \$2.50 per doz.

WISTARIA (Chinese Wistaria).

sinensis. An acknowledged queen among all climbers. The foliage is elegant and glossy; the long pendant clusters of beautiful pale blue flowers are borne in May and June. The plant climbs to the tops of tall trees. 50 cts. each, \$5 per doz.

sinensis alba. A pure white variety. 50 cts. each, \$5 per doz.

Hardy Ferns.

20 Cents Each, \$2 per Dozen.

Adiantum pedatum. "Maiden Hair." Polished black leaf stems, delicate and beautiful fronds. 1 foot high.

Aspidium acrostichoides. "Christmas Fern." 1 foot high.

Aspidium marginale. "Margined Shield Fern." 1 to 2 feet high.

Onoclea sensibilis. "Sensitive Fern." Very handsome fronds. 2 feet high.

Osmunda cinnamomea. "Cinnamon Fern." 5 feet high.

Osmunda Claytoniana. "Flowering Fern." 3 feet high.

Osmunda regalis. "Royal Fern." 3 feet high.

Polypodium vulgare. "Rock Fern." 10 inches high.

Pteris aquilina, "Brake." 3 feet high.

Scolopendrium vulgare. "Heart's Tongue." 10 inches high.

Hardy Grasses.

ARUNDO (Reed Grass).

Donax. A magnificent hardy grass, growing to a height of 15 feet and forming dense clumps. Towering straight stems of the deepest green, clasped at regular intervals with broad pointed foliage. 20 cts. each, \$2 per doz.

Eulalia japonica zebrina.

Donax variegata. Foliage beautifully variegated with stripes of silver and green. 25 cts. each, \$2.50 per doz.

ELYMUS.

glaucus. 3 to 4 feet high; the blades have a bluish metallic lustre. 25 cts. each, \$2.50 per doz.

EULALIA.

gracillima. Light green narrow foliage, growing 3 to 4 feet high; extremely graceful, and very useful for giving relief to stiff borders. 25 ets. each, 2.50 per doz.

iaponica. Foliage bright green all summer, from which rise in autumn, tall, plume-like flower spikes 3 to 5 feet high, resembling those of the Pampas grass or Sugar Cane. 25 ets. each, \$2.50 per doz.

japonica variegata. The leaves of this variety are banded longitudinally with pale yellow. 25 cts. each, \$2.50 per doz.

japonica zebrina. The best and most striking variety, with leaves banded transversely with pale yellow. 25 cts. each, \$2.50 per doz.

FESTUCA.

glauca. A handsome tufted grass with glaucous green foliage. 25 cts. each, \$2.50 per doz.

PHALARIS (Ribbon Grass).

arundinacea variegata. A free growing variegated grass, 2 to 3 feet tall. 15 cts. each, \$1.50 per doz.

JAMAICA PLAIN, MASS., Nov. 13, 1896.

The Cattleyas arrived last evening in perfect order, being beautifully packed. They are strong, healthy looking plants, and I hope will do well with me.

H. B. WALLEY.

SEABRIGHT, N. J., Dec. 15, 1896.

I beg to acknowledge receipt of consignment of Orchids in good condition.
ROBT. MILLICAN, Gard. to T. R. Palmer.

WESTFIELD, MASS., Nov. 26, 1896.

I wish to thank you for sending such nice clean stock, and also for the care used in packing. The small number of broken pots was noticeable. GEO. MIELLEZ.

DALLAS, TEX., Nov. 6, 1896. The Lily bulbs received in the last package were the biggest and finest I ever had. J. REVERCHON.

PETROLIA, Canada, May 1, 1896.

The plants I ordered from you came so beautifully packed that apparently there was not a leaf disturbed. It is a great pleasure to receive plants in such good condition. The Cypri-pediums and other plants I got from you last autumn have done very well.

MRS. B. MONCRIEFF.

NIAGARA FALLS, N. Y., Nov. 13, 1896. Ferns to hand in splendid order. I am more than satisfied. I only regret that I did not make the order larger.

WM. P. LYON.

Hardy Ornamental Trees and Shrubs.

The proper selection and planting of Hardy Ornamental Trees and Shrubs is one of the first considerations in home adornment or Landscape Gardening. Deciduous Trees, Shrubs and Vines may be planted either in spring or fall. Evergreens usually succeed best when planted in spring; and this season is recommended for planting all Hardy Ornamentals in cold climates.

DECIDUOUS TREES.

ACER (Maple).

- dasycarpum. "White or Silver-leaved Maple." A rapid growing North American species; the foliage is dark green above and silvery white beneath. 50 cts. to \$1.
- dasycarpum Weirii laciniatum. "Weir's Cut-leaved Silver Maple." Beautifully cut leaves, silvery white underneath. 75 cts. to \$1.
- platanoides. "Norway Maple." A handsome, large growing tree of spreading habit, with large deep green, shining foliage. 75 cts. to \$1.
- polymorphum. "Japan Maple." The foliage of these beautiful dwarf trees or shrubs is unequalled among hardy stock for outdoor planting. It is elegantly cut and colored and very brilliant in effect. Some of the best varieties have proved to be entirely hardy, even in exposed situations. They are most satisfactory when planted in beds or masses. \$1.50.

AESCULUS (Horse Chestnut).

Hippocastanum. "The European or White-flowering Horse Chestnut." This is the well known species, forming a large handsome tree. 50 cts. to 75 cts.

BETULA (Birch).

alba. "European White Weeping Birch." A graceful tree, with slender branches and silvery bark. 50 cts.

CATALPA.

- bignonioides. A showy, rapid growing species, with heart shaped leaves and pyramidal clusters of white flowers. 75 cts.
- bignonioides aurea variegata. "Golden Catalpa." A medium sized tree of rapid growth, with heart shaped leaves which are a beautiful golden color in spring, but later become green. \$1.
- bignonioides speciosa. Finer and hardier than C. bignonioides, and blossoming two or three weeks later. 75 cts.

CERCIS.

- canadensis. "Judas Tree or Red Bud." A very ornamental native tree of medium size, with heart shaped leaves. The branches are covered with a profusion of reddish purple flowers in early spring. 75 cts.
- japonica. "Japan Judas Tree." Grows to medium height; foliage deep, shining green, and heart shaped; flowers larger than those of C. canadensis. \$1.

CORNUS (White Flowering Dogwood).

florida. Our native American species, with bold white flowers in early spring. \$1.

FAGUS (Beech).

- ferruginea. "American Beech." One of the finest of American trees. 50 cts.
- purpurea Riversii. "Rivers' Smooth-leaved Purple Beech." This is by far the finest of the Purple-leaved Beeches; of compact and symmetrical habit, with dark purple foliage. \$1.50 to \$3.

FRAXINUS (Ash).

excelsior pendula. "Weeping Ash." The well known fine lawn tree. \$1.50.

LARIX (Larch).

europæa. "European Larch." A graceful native of Southern Europe. 50 cts.

LIRIODENDRON.

tulipifera. "Tulip Tree or Whitewood." A grand native tree of tall, pyramidal habit, having large, glossy leaves and tulip-like flowers. 50 cts. to 75 cts.

MAGNOLIA.

conspicua. "Chinese White Magnolia." A fine variety from China. The flowers are large and pure white, appearing before the leaves. \$1.50 to \$2.

POPULUS (Poplar).

aurea Van Geertii. "Van Geert's Golden Poplar." Golden yellow foliage; very fine for massing. 75 ets.

fastigiata or dilatata. "Lombardy Poplar." A well known species of very rapid growth. 50 cts.

SALIX.

caprea pendula. The well known Kilmarnock Weeping Willow, 75 ets.

TILIA (Linden).

shaped tree, with large leaves and fragrant flowers. 75 cts.

ULMUS (Elm).

montana Camperdown pendula. "Camperdown Weeping Elm." One of the most attractive weeping trees. \$1.

Deciduous Shrubs.

ALTHAEA (Rose of Sharon).

Double varieties, in separate colors. White, blue, purple, red. 25 cts.

folia variegata. One of the finest variegated shrubs; double purple flowers. 30 cts.

AZALEA.

mollis. Richly varied flowers. 75 cts.

pontica. Distinct colors and habit. 75 cts.

BERBERIS (Barberry).

Thunbergii. "Japan Barberry." 25 ets.

vulgaris. "Common European Barberry." 25 cts.

vulgaris purpurea. "Purple Barberry." 25 cts.

CALYCANTHUS (Sweet-scented Shrub).

floridus. ["Carolina Allspice." Leaves soft and downy; flowers of chocolate color, quite fragrant. 25 cts.

CLETHRA (Sweet Pepper Bush).

alnifolia. A free flowering native shrub with white, sweet-scented flowers. 25 cts.

CORNUS (Dogwood).

sanguinea. "Red branched Dogwood." 25 cts.varieqata. "Variegated leaved Dogwood." 35 cts.

CYDONIA (Quince).

iaponica. "Scarlet Japan Quince." 25 ets.

japonica alba. Blush colored flowers. 35 ets.

CYTISUS.

Laburnum. "Golden Chain." A dwarf growing tree bearing racemes of golden yellow flowers. 35 cts.

DEUTZIA.

crenata. 25 cts.

crenata fl. pl. "Double Deutzia." 25 cts.

gracilis. 25 cts.

Pride of Rochester. 25 ets.

DIERVILLA (Weigela).

candida. "White flowered Weigela." 35 cts.

rosea. "Rose colored Weigela." 25 cts.

EXOCHORDA.

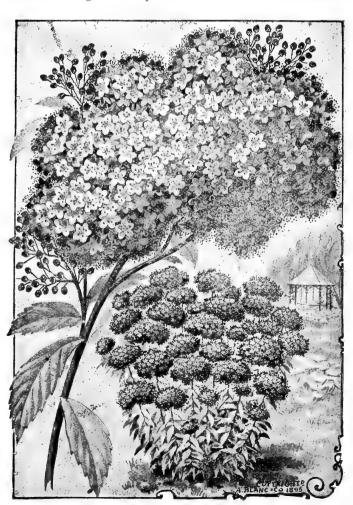

grandifiora. A fine shrub from Northern China, producing large white flowers in May. 50 ets.

FORSYTHIA (Golden Bell).

Fortunei. "Fortune's Forsythia." 25 cts. suspensa. "Weeping Forsythia." 25 cts.

HYDRANGEA.

paniculata grandiflora. A fine shrub, growing 8 to 10 feet high, and producing white flowers on immense panicles, in August and September. 25 cts. to 50 cts.

Spiraa Anthony Waterer .- See page 50.

LIGUSTRUM (Privet).

ovalifolium. "California Privet." 25 cts.

LONICERA.

fragrantissima. "Fragrant upright Honeysuckle." 25 ets

PHILADELPHUS (Syringa or Mock Orange).

coronarius. A well known shrub, with pure white, highly scented flowers. 25 ets.

foliis aureis. "Golden leaved Syringa." 30 cts.

PRUNUS (Plum).

Pissardii. "Purple leaved Plum." One of the finest small growing, purple leaved trees. Flowers small, white, covering the tree in early spring. 35 cts. to 50 cts.

SAMBUCUS (Elder).

nigra aurea. "Golden Elder." A handsome shrub with golden yellow foliage. Valuable for intermixing with darker leaved shrubs. 35 cts. to 50 cts.

SPIRAEA (Meadow Sweet).

Anthony Waterer. "Crimson Spiræa." This plant is of dwarf habit, producing a profusion of bright crimson flowers from June until the early fall months. 35 cts. (See illustration, page 49.)

callosa. "Fortune's Spiræa." Deep rose. 25 cts.

callosa alba. A white form of the preceding. 25 cts.

prunifolia fl. pl. "Double flowering Plum leaved Spiræa."
White blossoms. 25 ets.

Reevesii. "Lance leaved Spiræa." Round clusters of white flowers. 25 cts.

Thunbergii. "Thunberg's Spiræa." Flowers small, white, appearing early. 25 cts.

Van Houttei. White flowers. The finest of the Spiræas. 25 cts.

SYRINGA (Lilac).

Charles X. A strong rapid growing variety, with large trusses of reddish purple flowers. 50 cts.

persica. "Persian Lilac." Purple flowers. 35 cts.

vulgaris. "Common purple Lilac." 35 ets.

vulgaris alba. "White Lilae." 35 ets.

TAMARIX (Tamarisk).

africana. Upright habit; flowers in May. 35 cts.

chinensis. A very vigorous grower; flowers rose colored, appearing in September. 35 ets.

VIBURNUM (Snowball).

Opulus sterilis. "Snowball Tree." 35 cts.

plicatum. "Plicate Viburnum." Handsome plicate leaves and globular heads of pure white flowers; moderate height. 50 cts.

Evergreen Trees.

ABIES (Spruce, Fir and Hemlock).

balsamea. "Balsam Fir." A very erect, pyramidal tree, with dark green foliage; grows very rapidly. 50 cts.

canadensis. "Hemlock Spruce." A beautiful native tree of drooping habit, with dark green, delicate foliage 50 cts. to \$1.

excelsa. "Norway Spruce." An elegant tree, of lofty growth; very hardy. 50 ets. to \$1.

pungens. "Colorado Blue Spruce." One of the hardiest and most beautiful of the Spruce family; habit very similar to the White Spruce; foliage blue or sage color. \$2 to \$3.

BIOTA (Oriental or Eastern Arbor Vitæ).

orientalis. "Chinese Arbor Vitæ." A small tree, with erect branches and light green foliage. \$1.

PINUS (Pine).

austriaca. "Austrian Pine." A tree of remarkably robust habit, very hardy and spreading. 50 ets. to \$1.

sylvestris. "Scotch Pine." A fine, robust, rapid growing variety, with stout, erect shoots; very hardy. 50 cts.

RETINOSPORA (Japan Cypress).

plumosa. A dwarf, shrubby Evergreen, with feathery branchlets. 75 cts.

plumosa aurea. "Golden Plume Retinospora." A golden tipped variety of the preceding. 75 ets.

THUYA (Western Arbor Vitæ).

occidentalis. "American Arbor Vitæ." A beautiful native tree, valuable for screens and hedges. 50 cts.

occidentalis compacta. Dwarf, compact habit and dark green foliage. 50 cts.

Evergreen Shrubs.

AZALEA.

amœna. Pretty dwarf Shrub, with rosy purple flowers and leaves that turn reddish bronze in winter. 75 cts. to \$1.

BUXUS (Box).

sempervirens nana. "Dwarf Box." Used for edging paths and beds. 30 cts. per yard.

MAHONIA (Ashberry).

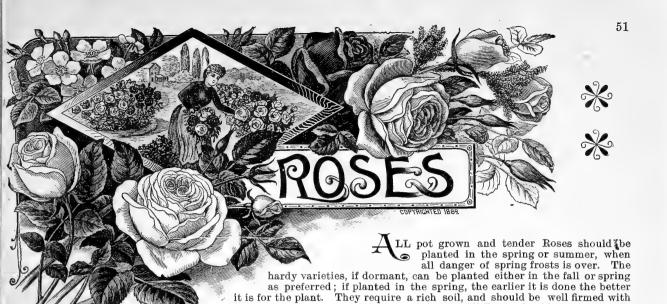

aquifolia. Of medium growth, with shining, prickly leaves, and bright yellow flowers in May; berries purplish. 35 cts.

RHODODENDRON (Rosebay).

catawbiense. Named varieties to color, in fine assortment.

Strong plants, with flowering buds, 18 to 24 inches high. 75 cts. to \$2.

maximum. "Great Laurel." A superb shrub, bearing large trusses of pink and white flowers in July. We have in stock an extra fine lot of strong clumps which will give immediate effect. 75 cts. to \$2.

pruned when planted in order to obtain the best results, some varieties March is the best time for this. During the winter months it is best to give all varieties requiring more, others less. a slight protection, especially Bengal, Noisette, Tea, and most of the Bourbon classes.

SELECT HARDY ROSES.

*Alfred Colomb. One of the most useful for general cultivation, with extra large, round flowers, very full and double.
Color carmine crimson; very fragrant.

†Anna de Diesbach. A superior variety; vigorous grower
and fine bloomer. Color brilliant crimson; flowers very large
and delightfully fragrant.

†Auguste Mie. A free blooming variety, with glossy pink
flowers.

flowers.

*Baron de Bonstetten. Velvety maroon, shaded deep

*Baron de Bonstetten.
crimson. One of the best.
*Baroness Rothschild.

*Beneral Jacqueminot.
tremely effective; fragrant, and of excellent, hardy babit.
Makes magnificent buds, and is highly esteemed as one of the best and most desirable varieties for open ground, as well as

best and most desirable varieties for open ground, as well as forcing.

*Gloire de Margottin. Flowers very large, somewhat globular, and deliciously scented; color brilliant searlet. Vigorous and free flowering, and excellent for outdoor culture.

*Hermosa. A constant bloomer, with large, double, fragrant flowers, in clusters; color clear rose. One of the best.

*Magua Charta. A splendid Rose, with extra large flowers, rosy red, flushed with bright crimson. A sure and profuse bloomer, and one of the hardiest and best for general planting.

*Margaret Dickson. Large white, pale flesh center.

good substance.

*Margaret Dickson. Large white, pale flesh center; of good substance.

*Marshall P. Wilder. Flowers large and well formed. Color bright carmine, richly shaded with maroon; fragrant. Very free growing and flowering, and on account of its fine flowers it is a very desirable variety.

*Mme. Plantier. Pure white, above medium size, very double flowers: profuse bloomer, and excellent for massing in groups.

*Mrs. John Laing. Flowers large, of fine form, produced on strong stems. Color delicate pink, exquisitely shaded.

*Paul Neyron. Flowers immense in size, deep rose, very full and double; finely scented. A free bloomer, and very desirable as a garden Rose. No collection is complete without this magnificent variety.

**Silver Queen: Silvery blush, shading to delicate rose. Distinct and lovely.

*Ulrich Brunner. Cherry red; extra large flowers; fine form, carried well upon the plant. One of the best varieties for tinet and lovely forcing.

Variaties marked † Strong, one year old, 25 cts. each, \$2.50 per doz. Varieties marked * Strong, two year old, 50 cts. each, \$4.00 per doz.

TEA OR EVERBLOOMING ROSES.

Bridesmaid. A deep, even, constant shade of pink; buds beautiful and very lasting.

Catherine Mermet. Bright silvery pink; a favorite winter blooming Rose.

Catherine Merm blooming Rose. Maman Cochet.

aman Cochet. Exceedingly large, handsome flowers of beautiful pink, tinged with warm yellow; a superb garden va-

beautiful pink, tinged with warm yellow; a supero garden variety.

Mme. Cusin. Violet rose, tinged with yellow.

Mme. Hoste. Finely formed flowers, varying from creamwhite to canary yellow.

Mrs. Pierpont Morgan. A sport from Mme. Cusin, with flowers much larger and very double, sometimes measuring 4½ inches through. Growth stronger than in the parent; free blooming, foliage larger; color clear, intense cerise or rose pink. Fragrant, beautifully formed and lasting.

Niphetos. Long, beautiful buds, sometimes tinted with yellow

Papa Goutier. Rich cherry red; buds very large and long; semi double

the feet, taking care not to hurt the roots. All Roses should be moderately

Perle des Jardins. Bright, pure canary yellow; large, full and sweet.

The Bride. A superb white Rose; buds large, fragrant, lasting.

Three-inch pots, 15 cts. each, \$1.50 per doz. Four-inch pots, 25 cts. each, \$2.50 per doz.

HYBRID TEA ROSES.

American Beauty. Very large, fragrant flowers of rosy-crimson. 20 cts. Augustine Guinoiseau. White La France. Pearl white,

with rose center. 20 cts.

Belle Siebrecht. Large, full, handsome flowers, long and tapering in bud; deep, clear pink, becoming brighter with age; is thus especially available for cutting, as it does not fade out on exposure. 25 cts.

on exposure. 25 cts.

Clothilde Soupert. Flowers large, borne in clusters, full, double, and denciously sweet; pearly white, with rosy lake centers, occasionally both white and red flowers being produced on the same plant. Free and constant bloomer, of easy culture, and is highly recommended for open ground or house culture.

on the same plant. Free and constant bloomer, of easy culture, and is highly recommended for open ground or house culture. 20 cts.

Cloire de Dijon. Large, perfectly double and tea scented; color rich, creamy white, beautifully tinged with amber and nale blush. 35 cts.

Kaiserin Augusta Victoria. Ivory white; full, fragrant; buds long and pointed. The best white Rose of recentintroduction. 20 cts.

La France. Delicate silvery rose, changing to silvery pink. A constant bloomer, very beautiful in form and color, producing a wonderful profusion of buds and flowers all through the season; deliciously fragrant; the sweetest and most useful of all the Roses, which cannot be surpassed in the delicacy of its coloring. Commences to bloom soon after being planted out. 20 cts.

Meteor. Rich, dark velvety crimson; very free blooming; fine for bedding and winter flowering. 20 cts.

Mine. Caroline Testout. Deep, clear pink; full and large; buds elegantly formed. A free blooming Rose of great beauty. 20 cts.

20 cts.

CLIMBING ROSES.

Crimson Rambler. This Rose is of Japanese origin, hardy, with strong shoots that climb high in a season, or may be cut back into handsome bush form. The foliage is noticeably distinct and handsome, light glossy green, thick and leathery. The flowers are produced in great pyramidal panicles of brilliant crimson. Each one is a perfectly double little rosette, and from 30 to 40 are usually missed in one truss. As a decorative pot plant it is also strikingly effective. Strong plants, three-inch pots, 25 cts. each, \$2.50 per doz. Extrastrong, 50 cts. each, \$4.00 per doz. doz

Baltimore Belle. Pale blush, almost white; very double. Flowers in graceful clusters, the whole plant appearing a beautiful mass of bloom.

Climbing Jules Margottin. Carmine rose; fine in open flower and bud. The best of all the climbing sports, and should be in every collection.

Climbing Victor Verdier. Bright rose, with carmine center; very large, full and fragrant.

Dawson. Flowers quite full, deep pink and very fragrant. Produced in clusters.

Prairie Queen. Clear, bright pink, sometimes with a white Baltimore Belle. Pale blush, almost white; very double.

duced in clusters.

Prairie Queen. Clear, bright pink, sometimes with a white stripe; very full and double, and blooms in clusters.

Wichuralana. A distinct and valuable variety from Japan. Flowers produced in clusters in greatest profusion after June Roses are past. Pure white, with yellow stamens, with fragrance of the Banksia Rose.

In this list we offer no small rooted cuttings or small plants, all stock being strong, two year old dormant plants. 50 cts. each, \$4.00 per dozen.

ORCHIDS.

It is well acknowledged that Orchids produce the handsomest, strangest and most lasting flowers in all the vegetable kingdom. Every private collection of plants has some representative of this royal family, and any lover of plants should not be without a few specimens. They are easily grown, being fond of pure fresh air and plenty of light, while many delight in sunshine. Any beginner will be able to grow them without difficulty by following general cultural directions given in our pamphlet "Orchids for Beginners," which is mailed free on application.

The following varieties we can strongly recommend:

BRASSAVOLA.

glauca. A pretty species, native of Mexico. It thrives best in an intermediate temperature, and blooms in early spring. The flowers are borne singly on a short stem, and are very fragrant; sepals and petals pale green, lip pure white, with pink streaks in the throat. \$1 to \$1.50.

CALANTHE.

Terrestrial Orchids of vigorous growth and easy culture; especially recommended to beginners. They thrive in any ordinary greenhouse, and their handsome flowers are produced in midwinter when flowers of this class are most esteemed.

Regnieri. \$1 to \$1.50.

Veitchii. \$1 to \$2.

vestita rubro-oculata. \$1 to \$2.

CATTLEYA.

Bowringiana. Flowers 2½ inches across, rich rosy purple with darker veins, on a tall 5 to 10-flowered stem. A very pretty variety and one of the easiest in cultivation. Native of Honduras. Flowers in October and November. \$1.50 to \$2.

citrina. "The Tulip Orchid." Different from other Cattleyas in that it usually bears solitary flowers hanging downward, instead of several on an upright spike. The large blooms are clear lemon yellow, and delightfully fragrant. They open in April and May. \$1 to \$1.50.

Dowiana. A grand and distinct species, with from two to six very large and strikingly colored flowers borne on a scape. The sepals and petals are rich, soft, nankeen yellow, while the lip is intense velvety purple, shaded with violet rose and barred with lines of gold. The plant requires more heat than is usually given to Cattleyas. A native of Costa Rica, blooming during the summer months. \$2,\$3 and \$4.

gigas. Rightly named gigas, being the largest flowered Cattleya known. The flowers are often 8 inches across, on a 3 to 5-flowered scape. The sepals and petals are of a delicate mauve purple, while the lip is rich crimson purple, with a large blotch of yellow in the throat. One of the grandest of the group, requiring a slightly higher temperature than most varieties. A native of New Granada. Flowers in July and August. \$2 and \$3.

labiata vera. \$2, \$3 and \$5.

Mendelli. A grand variety, with large flowers, varying from white to a pale, glossy pink, and with a large, spreading, crimson purple lip, much crimped at the margin and with a yellow blotch in the center. One of the easiest to cultivate, and strongly recommended to beginners. A native of New Granada. Flowers late in spring and early summer. \$1 to \$2.

Mossiæ. One of the finest Orchids known. The flowers are quite fragrant, very large and brightly colored, and, borne from 3 to 5 on a scape, make quite a brilliant show. They vary through beautiful shades of lilac and rose, with a lip of rich purple, much crimpled and ruffled on the lilac margin. A native of Venezuela, flowering from April to August. \$1 to \$2.

Percivaliana. This variety has very richly colored flowers shaded something like C. Mossiæ, but generally smaller and darker. The lip is brilliant crimson marked with golden yellow in the throat, and relieved by a much fringed margin of rosy pink. Blooms from November to February, when flowers are scarce. \$1 to \$2.

Schræderæ. A beautiful large flowered, light colored variety, with yellow throat; flowering in the early spring. \$2 to \$3.

Skinneri. \$1 to \$1.50,

speciosissima. A very large and sweet scented winter blooming Cattleya, with flowers of blush rose. Grows best in baskets or on blocks, in a temperature of from 70 to 75 degrees. \$1 to \$1.50.

Trianæ. The most useful Orchid in cultivation. The flowers are borne in midwinter, from two to four on a scape, at a time when they are most in demand, and remain perfect a long time, even when cut. They are very large and wide, varying from almost pure white through all shades of rose, lilac and purple in exquisitely blending tints. \$1, \$2 to \$3.

CHYSIS.

A beautiful genus, producing showy flowers from pure white to golden brown, in lateral racemes. The species are easily grown in baskets in peat and moss.

aurea. \$1 to \$2.

bractescens. \$1 to \$2.

COELOGYNE.

cristata. One of the best winter flowering Orchids and one of the easiest to cultivate. The flowers are borne in drooping, many flowered racemes, and remain perfect for a long time. They are pure white with the exception of a yellow blotch in the center of the lip and its golden crested veins. \$1 to \$2.

cristata alba. \$3, \$5 and \$8.

lentiginosa. \$1.50 to \$2.

Massangeana. An unusually handsome vigorous species that blooms twice a year. The racemes are very long, and droop gracefully with their weight of many flowers. The sepals and petals are a light ochre color; the lip is three lobed and beautiful maroon brown, with yellow veins. \$1.50 to \$2.

speciosa. \$1 to \$1.50.

Dendrobium nobile.

DENDROBIUM.

Calceolus. \$1 to \$3.

formosum giganteum. Beautiful evergreen Dendrobe, producing its flowers from the top of the bulb in clusters of 4 and 6. Flowers are of a very clear ivory color, with a yellowish green blotch on the lip. It should be grown in a basket, with a temperature of 60 to 65 degrees. Flowering season is in the autumn. Native of India. \$1.50 to \$2.

unobile. One of the most beautiful species. The flowers are large and very fragrant, varying from white through shades of purple. Blooms from January to June. \$1 to \$2.

Phalænopsis Schræderianum. This is one of the handsomest of the Dendrobiums, producing long sprays of light pink flowers, very much resembling the Phalænopsis. \$1.50 to \$2.

EPIDENDRUM.

Natives of Tropical America, requiring a temperature of about 50 to 55 degrees. The flowers of most of the species are very fragrant and produced from the top of the bulb or stem. They are easily cultivated and grow rapidly.

aurantiacum. \$1 to \$2. rhizophorum. \$1 to \$1.50.

LAELIA.

albida. A lovely Mexican species with from 3 to 12 sweet scented blooms borne on tall stems, sometimes three feet high. The colors are very delicate, white and pale pink veined with yellow. In bloom from December to February. \$1 to \$2.

Anceps. A beautiful species, coming into flower about Christmas. From four to six blooms, about 4 inches across, are borne on a very tall scape. The sepals and petals are rosy blush; the lip deep purple shaded and marked with rose and yellow. \$1 to \$2.

Dayana. Flowers nearly four inches across, with rosy sepals and petals; lip of rich purple magenta and throat of yellowish white, with numerous deep purple keels. One of the freest and finest winter blooming Lælias. Of distinct dwarf growth; requires cool treatment. \$1 to \$1.50.

purpurata. This has been called the grandest Orchid in cultivation. Its flowers are sometimes eight inches across, borne 3 to 7 on an erect scape. The sepals and petals are pure white, while the large lip is of the most brilliant purple, with a pale yellow throat. Requires in general the same culture as Cattleyas. Flowers in May and June. A native of Brazil. 1.50 to \$3.

superbiens. \$1 to \$3.

LYCASTE.

cruenta. Flowers four inches across with bright yellow as a prevailing color, brightened by crimson dots and blotches on the appendage to the lip. Blooms from March to April. \$1 to \$1.50.

Deppei. \$1 to \$1.50.

Skinneri. "Monk Orchid." One of the most popular Orchids, bright, free flowered and lasting. The blooms are five or six inches across, thick textured and widely open; the prevailing colors are rose and pink, with deep crimson spots on the white lip. Blooms in winter. \$1, \$2 to \$3.

MASDEVALLIA.

The Masdevallias are bulbless epiphytes of easy culture, with curious unusually bright colored flowers. Require cool treatment.

Harryana. \$1 to \$2.

Lycaste Skinneri.

ODONTOGLOSSUM.

bictonense. \$1 to \$1.50.

citrosmum. This plant produces its long, pendulous spikes of fragrant, lemon colored flowers in June and July. The sepals and petals are sometimes flushed and dotted with pink, and the mauve colored lip has a claw of orange yellow. Fine for exhibitions, sometimes remaining perfect four weeks. \$1 to \$1.50.

crispum. One of the finest of all Orchids. The flowers are white, about four inches across, with spots of reddish brown near the center, and are borne from 6 to 12 in long arching airy racemes Blooms from January to May and occasionally through the year. \$1, \$3 and \$5.

${\bf ODONTOGLOSSUM-} Continued. \\$

grande. "Baby Orchid." Rightly named O. grande, because it is really one of the finest and showiest Orchids in cultivation. The flowers are very large, and gaily colored with yellow and rich chestnut brown. \$1 to \$1.50.

Odontoglossum grande.

Harryanum. \$1 to \$1.50.

luteo-purpureum. A magnificent plant, with leaves two feet long and flowers 3 inches or more across, on stems often a yard high. The sepals and petals are bright chestnut brown with tips and margins of yellow; the lip is ivory white with reddish brown spots and crest of deep yellow. \$1 to \$2.

vexillarium. "Miltonia." A species which ranks among the first of all Odontoglossums, yet is quite distinct among them all. The slender scapes bear from 5 to 7 large flowers with sepals, petals and two lobed lip all of bright rosy pink. \$1 to \$2.

ONCIDIUM.

ampliatum majus. \$1 to \$1.50.

crispum. Remarkably handsome and large flowering, with tall stems bearing from 50 to 60 blooms in a spreading panicle. The ground color of the flower is yellow, spotted with reddish brown. The plant blooms at different times in the year, and remains beautiful for three or four weeks. \$1 to \$1.50.

cucullatum giganteum. \$1 to \$1.50.

Gravesianum. \$1.50 to \$2.

incurvum. Flowers white and purple, small but produced in great numbers on a long raceme. Fine for cut flowers; blooms in September and October. \$1 to \$2.

ornithorhynchum. A very distinct and dainty species, with small, fragrant, rose colored blossoms, borne in great numbers on graceful drooping spikes. October to February. Grows well in a basket or pot. \$1 to \$2.

tigrinum unguiculatum. \$1 to \$2.

varicosum. A beautiful, strong growing species, producing large, bright, yellow flowers on a long scape, in great profusion, during the fall and early winter months. \$2 to \$3.

PERISTERIA (Dove Orchid).

elata. A remarkable species of noble habit. The erect flower scapes are produced from the sides of their large bulbs and are from three to five feet in height. The flowers are borne in long racemes and are waxen white and globular in shape. The inner divisions of each flower distinctly resemble in outline a dove with outspread wings, \$1.50 to \$2.

PHAIUS.

maculatus. A very desirable variety from India, producing rich yellow flowers on short spikes. The leaves are long, dark green and spotted with white. \$1 to \$1.50.

SCHOMBURGKIA.

Tropical plants, with large flowers on scapes from three to five feet long. Should be grown on blocks or in baskets near the roof.

undulata. \$1.50 to \$2.

SOBRALIA.

Quite unlike most other Orchids in habit and general aspect. The flower stems are reed like, and although they bear six or more large showy flowers, rarely more than one is open at a time. The blooms are large and brilliantly colored, and, coming in succession as they do, last a very long time. Grown in large pots of rough, fibrous peat.

macrantha \$1 to \$1.50.

SOPHRONITIS.

grandiflora. This plant has exceedingly brilliant flowers of deep crimson scarlet. November and December. Very showy and effective. \$1 to \$2.

SPIRANTHES.

 $\begin{array}{c} \textbf{colorans} \quad \textbf{maculata.} \quad A \quad \text{beautiful} \quad \text{terrestrial Orchid} \quad \text{with} \\ \quad \text{dark green, variegated leaves.} \quad \$1 \text{ to } \$1.50. \end{array}$

STANHOPEA.

A genus of easy culture, growing best in baskets suspended from the roof. The flowers are produced from the base of the bulb, taking a downward direction.

grandiflora. \$1 to \$2.

oculata. \$1 to \$2.

VANDA.

cœrulea. A grand Orchid—one of the finest of the autumn flowering species. The flowers are four inches across, of a pale blue color, marked with azure blue, and are borne on light blue pedicels, 10 to 18, forming a large raceme. The plant does best if grown in a basket with only broken pots and moss, in a temperature of 60 degrees, with plenty of light and good ventilation. October to December. A native of the Khasya Hills, in Northern India. §2 and §3.

ZYGOPETALUM.

These are tropical Orchids of easy culture, producing their large, bright flowers during the winter months. Grown in pots of peat and moss.

crinitum. \$1 to \$1.50.

Cypripediums (Venus Slipper Orchids).

By far the most beautiful, interesting and varied genus of the Orchid family, not only rich in fine natural species, but also represented by hundreds of beautiful garden hybrids. The colors are rich and pleasing, and combine well with Roses and fine Ferns.

Amesianum. \$1.50 to \$2.

Arthurianum. \$2 to \$3.

Ashburtoniæ. A distinct hybrid, with green dorsal sepal and brown veins; petals white, tinged with green; pouch pale purple. Of very easy culture. \$1 to \$2.

Cypripedium insigne.

barbatum. This fine variety blooms at different times in the year, lasting for six weeks or more. The dorsal sepal is white, green and purple, the petals dotted with rough hairy tufts; lip is dark brownish purple. \$1 to \$1.50.

Barteti. Dorsal sepal white and yellowish green, veined with brown; petals pale purplish brown; lip reddish brown; staminode yellow. §1.50 to §2.

Boxallii. Flowers large and glossy; dorsal sepal green, white and purple; petals and lip greenish yellow, tipped with purple A desirable free blooming species, in bloom from December to February. \$1.50 to \$3.

calurum. A noble hybrid, with tall stem, bearing in succession beautiful rosy red flowers. \$1 to \$2.

calurum Rougieri. A variety more beautiful, being stronger in growth and oroducing larger and more deeply colored flowers. \$2 to \$3.

Calypso. A charming hybrid, with white and yellow flowers suffused with rose on the dorsal sepal. \$2 to \$3

cardinale. A beautiful hybrid of compact growth, producing beautiful white and rose colored flowers, which last a long time in perfection. \$2 to \$3.

caudatum. A remarkable Orchid of very singular character. The flowers are yellow, brown and purple, with red spots on the lip. The petals are abnormally developed, and hang down often for two feet. April to May. \$2, \$3 and \$4.

Chamberlainianum. A distinct novelty, producing flowers of yellowish white and purple; flowers in succession for several months. \$2 to \$3.

Charlesworthii. A striking novelty, with beautiful rosy pink and greenish white flowers; flowers during the autumn and winter months. \$1.50 to \$2.

Crossianum. A garden hybrid, bearing whitish green flowers veined with purplish brown. \$1.50 to \$2.

Dauthieri. Resembling C. Harrisianum but of a more delicate color; flowers abundantly during the winter months. \$1, \$2 to \$3.

Dominianum. A beautiful tall growing variety with from three to five flowers on a stem. The sepals and petals are yellow, the latter being about eight inches long and marked with rose and green; the large lip is yellow, with brown veins and crimson spotted mouth. September to November. \$1, \$2 to \$3.

Harrisianum. A free flowering, easily grown plant, succeeding well in an intermediate temperature and blooming twice in a year. The dorsal sepal is large and dark shining purple with a white upper margin; petals and lip are brownish purple, marked with green. Interesting because it was the first of the artificially raised hybrids. \$1, \$2 to \$3.

Harrisianum Pitcherianum. An extra fine form of C. Harrisianum, with much richer markings throughout the whole flower. \$1.25 to \$2.

Haynaldianum. A beautiful species with long stems of yellowish green flowers, tinged with pink and blotched with brown. \$1.50 to \$2.

hirsutissimum. A distinct species with green and purplish flowers; blooms often measure six inches across. \$1.50 to \$3.

insigne. A well known, good old species, the best for beginners. The plants will do well in any ordinary greenhouse or even in a sunny window. The flowers are large and shining, in various shades of green, brownish purple and white. In bloom from November to March; flowers very lasting. \$1 to \$1.50.

Cypripedium Lawrenceanum.—See page 56.

insigne Chantinii. The finest of the deep colored insignes, with a large dorsal sepal beautifully marked with deep purple spots. \$2 to \$3.

insigne maximum. A fine bold form of C insigne, with much finer markings and larger flowers. \$1.50 to \$2.

Lathamianum. A beautiful hybrid between C. villosum x C. Spicerianum. Flowers yellowish green, margined with white, and a deep purple midrib the entire length of the dorsal sepal. \$2 to \$3.

Lawrenceanum. One of the most beautiful species. The flowers are large and borne singly on a tall scape. The large dorsal sepal is white, with lines of brownish purple; the rest of the flower is purplish brown and green, shaded with red. The foliage is also fine, being dark green, tesselated with yellow. A native of Borneo; flowering in summer. \$1 to \$2.

Leeanum. A fine winter flowering Orchid. Dorsal sepal white, with dotted purple lines down the center; petals and pouch shining brownish red. \$1 to \$2.

leucorrhodum. One of the most beautiful of this class, having fine white flowers tinged with delicate rose; flowers in succession for many weeks. \$5 to \$7.50

longifolium. A stately variety, producing long stems of pale green flowers faintly streaked with purple; petals margined with red. \$1 to \$1.50.

luridum. \$1.50 to \$2.

Cypripedium venustum.

Choice Orchids__

50 CENTS EACH.

We are also offering *special* inducements in Orchids, in such varieties as Cattleyas, Lælias, Cypripediums, Odontoglossums, etc., our selection; good, healthy plants that will bloom and give satisfaction. Order a collection of a dozen or a hundred at once, and if left to us you will be as well suited as though you were on the premises to select them yourself.

nitens. A charming hybrid resembling the well known C insigne, but flowering later in the season, which makes it a very desirable variety. \$2 to \$3.

cenanthum. Distinct flowers, mostly of a fine wine color, from which the variety takes its name. The large dorsal sepal is white above, green below, with purple veins and blotches; the petals are vinous purple, blotched at the base and tinged with yellow; the pouch is deep wine purple. \$1.50 to \$2.

cenanthum superbum. Large flowers of brighter color. \$2 to \$3.

pavonium. This variety has a very robust habit. Flowers yellowish green, veined and blotched with purplish brown. \$1.50 to \$2.

radiosum. \$3 to \$4.

Roezlii. A strong growing variety with yellowish green flowers suffused with rosy purple; almost a perpetual bloomer. \$1 to \$1.50.

Sallieri. \$1.50 to \$2.

Sallieri nigro-maculatum. A beautiful pale green variety with a white margin; dorsal sepal densely spotted with dark brown. \$2 to \$3.

Schræderæ. A remarkable variety with large purple and crimson flowers; blooms in December, and should have a place in every collection. \$2 to \$3.

Sedeni. A beautiful variety of easy culture, and one of the most useful among all the hybrids. The flowers are rose crimson and white, with a deep, bright lip, and appear in succession on a tall stem. In bloom more or less all the year. \$1, \$2 to \$3.

selligerum. A very desirable variety. Flowers vinous red, veined with crimson purple, with blackish warts on the petals. \$1.50 to \$2.

Spicerianum. This fine variety has large, handsome flowers, with purple, white and rosy violet as the prevailing colors. They appear from October to December, and last for over a month. A very desirable variety, now quite popular. \$1.50 to \$2.

venustum. A handsome species with greenish white and yellow flowers, flushed with purple throughout the flower. \$1 to \$2.

villosum. A very vigorous and free flowering species the flowers of which have a shining surface and look as if varnished. Their color is brownish or orange red, intermixed with light green and dark purple. In bloom from January to March. A fine exhibition plant, on account of its distinct color and lasting qualities \$1.50 to \$2.

Materials for Orchid-Culture.

Fibrous Peat, picked, ready for use \$3 50

PALMS.

This royal family of plants must be placed among the foremost of decorative plants. Their graceful and imposing beauty makes them invaluable for house decoration, either large or small; and as a background for groups, or as isolated specimens for vases or jardinieres, their bright green, shiny fronds give elegance to their surroundings. Besides their ornamental qualities, their hardiness is highly to be commended, as with ordinary care they will flourish in any place that has a moderate temperature.

21/200 000000000

ARECA.

Cocos Weddeliana.

lutescens. A remarkably fine decorative Palm, with long, arching fronds of firm texture, and rich shining green above and below. A robust grower, soon developing into fine specimens, well furnished with leaves.

cocos.

Weddeliana. An elegant, fine foliaged Palm, not attaining a great size, but almost an absolute necessity for mantel and table decoration and jardinieres; in fact, for the latter use it cannot be excelled, outlasting any other plant for that purpose.

Three-inch pots, 12-15 inches high\$0	35
Four-inch pots, 15-18 inches high 0	75
Five-inch pots, 20-24 inches high, three in a pot	50

CORYPHA.

australis. Rich green, fan shaped leaves, with brown stems; compact, robust habit. Very hardy, and useful for house decoration.

Kentia Belmoreana.

GEONOMA.

KENTIA.

Belmoreana. The Curly Palm. One of the most useful species for decorative purposes on account of its fine habit. The pinnæ are long and taper pointed.

Four-inch pots, 12-15 inches high\$1	00
Five-inch pots, 18-24 inches high 1	$0\tilde{c}$
Six-inch pots, 24-30 inches high	00

Forsteriana. Flat or Thatch-leaf Palm. The leaf segments droop instead of curving upward, as in K. Belmoreana, which it much resembles in other fine points.

Three-inch pots, 12-15 inches high \$0	85
Four-inch pots, 15-18 inches high 0	75
Five-inch pots, 20-24 inches high 1	50

LATANIA.

borbonica (Livistona chinensis). A very desirable species, one of the handsomest and most useful in the genus. It is of free and rapid growth, resisting dust and gas well, and showing its characteristic habit at an early age. Leaves very broad and beautiful: leaflets much recurved.

Four-inch pots, 12-15 inches high	\$ 0	50
Five-inch pots, 15-18 inches high	1	00
Six-inch pots, 20-24 inches high	2	00
Specimens	7	50

PRITCHARDIA (LICUALA).

grandis. Until lately so rare as to be almost unknown to the general public, though long recognized by collectors as one of the noblest Palms in existence. It is of rather dwarf habit, with spiny stems and broad, nearly circular, fan shaped leaves, beautifully fluted and closely veined. They are very light and graceful in appearance, but firm in texture, spreading to enormous size in fine old specimens.

Fine plants, in 4-inch pots,	12	inches high,	5	to	в	leaves	\$ 2	00
Five-inch pots16 to	18	64	7	to	8,	44	 5	00

LICUALA.

horrida. This is a grand variety, with dark green, fan shaped leaves, which are deeply cut. Compact in growth.

LIVISTONA.

rotundifolia. A dwarf, compact growing Palm, with round, palmate, many divided leaves. One of the most graceful and effective sorts, in many ways superior to Latania borbonica.

Five-inch pots, 12-15 inches high, 7 to 8 leaves......\$2 50

PHOENIX.

canariensis. A tall, graceful growing species of the Date Palm family, being very useful for general cultivation as a house plant. In the Southern states it is perfectly hardy, and is used as an ornamental plant for embellishing home grounds.

Four-inch pots, 12-15 inches high......\$0 50

reclinata. One of the best Palms in the genus for general cultivation. It is a fine, large growing species, of spreading, graceful habit. The fronds are arching, yet almost erect, and composed of many narrow, recurved pinnæ.

Phonix reclinata.

LONG BEACH, CAL, April 6, 1896.

The seven Palms came their two thousand miles in the finest condition of any plants I ever ordered from the East. They were extra large, and their condition and color show the best of raising; they are worth twice their cost.

C. W. CAMPBELL.

Livistona rotundifolia.

WASHINGTONIA.

filifera. Beautiful variety of the Fan Leaf Palm, very graceful habit, the large leaves being edged with fine threads, giving a plume like appearance.

Pritchardia (Licuala) grandis.

ZAMIA.

I.indeni. Rediscovered by our collector in Colombia a few years ago. Quite distinct from any other Cycad, and one of the most striking sorts among them all. The long, gracefully arching fronds are loosely set with broad, oval, light green leadets, above which the young growth shows in curling plumes of bright pink. \$1.50 to \$3.00.

FERNS.

No type of pure beauty in foliage is so generally admired as the Fern, or is adaptable for so many uses. Between the dwarf species, creeping close to the ground, and the lofty Tree Ferns, there are myriads of intermediate forms, every one beautiful in its; way. Many species are especially suited for cultivation in jardinieres or window boxes, either by themselves or with flowering plants, and nothing is so fine as Fern fronds for mingling with cut flowers

ADIANTUM.

- bellum. Handsome. A dwarf growing, almost erect variety, with lace like tufted fronds, about four inches long, each one carried like a plume, with soft, yet distinct edge. It succeeds well either in a greenhouse or wardian case. 35'cts.
- Capillus-Veneris. A low growing species, having creeping rhizomes. Very useful as a basket Fern or to grow on rockwork. 25 ets.
- Capillus-Veneris grandis.
- Capillus-Veneris imbricatum. A very handsome variety of A. Capillus-Veneris, but of a more drooping habit, having light green colored foliage, very much resembling Adiantum Farleyense. 50 cts.
- cuneatum. The best known of the Maiden Hair Ferns. Much used by Florists for bouquat green and general decorations. Of easy culture and fine growth. 25 cts.
- Farleyense. Queen of all the Maiden Hair Ferns in color, form and growth. The plant is shapely and quite robust, often producing fronds from 18 inches to 2 feet long by 2 feet wide. The young growth is usually of a beautiful pink tinge, shaded to dark and light tints of yellow and green. It requires stove treatment, and must never be allowed to get dry. Necessary to all really fine collections. 50 cts., 75 cts. and \$1.00.
- O'Brienii. A low growing species of rapid growth; very hardy. 35 cts.
- pubescens. A peculiar and beautiful form, given a very soft appearance by the brown pubescence which covers the stems. Very useful for baskets. 25 cts.

rhomboldeum. 35 cts.

Adiantum Farleyen.e.

tenerum. One of the most beautiful Ferns that can be grown for conservatory, greenhouse or decoration of any sort. It has many of the fine points of A. Farleyense. 25 cts.

ASPIDIUM.

tensimense. A choice variety, with glossy green fronds of stiff, firm, enduring texture. They are long, broad at the base, and taper gracefully to an elongated tip. Free and robustin growth, forming a rounded, shapely plant. 25 cts.

BLECHNUM.

occidentale. Very handsome long, tapering fronds that are very lasting when mixed with cut flowers. Easily cultivated, never infested by insects, and much grown among Orchids. 25 cts.

CYRTOMIUM.

falcatum. Hardy variety, having long, graceful, deep glossy green fronds, with undulating pinnæ. 25 cts.

DIPLASIUM.

latifolium. This variety has long, graceful fronds, the pinne of which are deeply cleft and serrated, making it a very attractive plant to grow into specimens; very symmetrical in growth

GYMNOGRAMME.

- chrysophylla. Gold Fern. The beautiful fronds are broad at the base, long and taper pointed, the divisions being delicate and lace like. This whole under surface is covered with yellow powder, and the stems are solden yellow. They are almost upright, and thickly produced from a close set crown. 25 cts.
- peruviana argyrophylla. This is considered the best of the Silver Ferns, as it has not only an abundance of the silvery powder on the under surface, but also a lighter frosting on the upper side of the fronds and stems. The splendid fronds are hroad and massive at their base, and sometimes two feet long. 35 cts.

LASTREA.

aristata variegata. A markedly beautiful variety, distinguished by the broad band of yellowish green that brightens the center of the pinnules. The fronds are long and graceful. 35 cts.

lipida. 25 cts.

MICROLEPIA.

hirta cristata. This is a beautiful Fern from the South Sea Islands. The tips of the fronds divide into a many branched crest. The general character and habit of growth is very free and graceful, and the charming droop of the tasseled fronds adapts it well for baskets. 50 cts.

NEPHRODIUM.

molle corymbiferum. A very interesting and desirable variety, erect in habit, producing branching fronds with crested ends. 35 cts.

Pteris Ouvrardii.

NEPHROLEPIS.

exaltata. The well known and indispensable Sword Fern; one of the very best species for decorative work. 50 cts.

exaltata Bostoniensis. A variety of the preceding, of a drooping habit, with long, arching fronds. 50 cts.

exaltata plumosa. A new, dense crested form, with the tips of the fronds so much branched that they form close, curling masses of glossy green. 75 cts.

tuberosa. 25 cts.

ONYCHIUM.

japonicum. A very useful Fern for table decoration; its light, graceful fronds show to perfection when so used. One of the best for general cultivation. 25 cts.

PLATYCERIUM.

æthiopicum. \$3.

alcicorne. The Stag Horn Fern. The grandest species known, with huge fronds, divided into broad, blunt segments. \$1.

alcicorne majus. \$3.

PTERIS.

adiantoides. 25 cts.

chinensis. 25 cts.

cretica. 25 cts.

cretica albo-lineata. Has whitish central rlbs. 25 cts.

cretica cristata. 25 ets.

cretica major. 25 ets.

longifolia, 20 ets.

Mayii. 35 cts.

Ouvrardil. 25 ets.

palmata. A strikingly handsome variety, with bold, deep green fronds of palmate form, from four to nine inches across each way. 25 cts.

serrulata. A very useful species for cutting. 25 cts.

serrulata densa. 25 cts.

tremula. 20 cts.

tremula Smithiana. Large, deep green fronds, with the ends of the pinnæ branched and tasseled, forming semi pendant tufts. Unique, graceful, and one of the best large growing Ferns. 50 cts.

SCOLOPENDRIUM.

vulgare. The well known Hart's Tongue Fern. Has long, simple fronds of bright green. 20 cts.

TREE FERNS.

Prices on application.

ASSORTED FERNS.

Assorted ferns for filling jurdinieres, including varieties of Adiantum, Aspidium, Blechnum, Gymnogramme, Lastrea, Pteris and Selaginellas.

Two-inch pots. 10 cts. each; \$1.00 per dozen. Three-inch pots. 15 cts. each; \$1.50 per dozen.

SELAGINELLAS.

cæsia. 25 cts.

cæsia arborea. A beautiful and well known form of vine like habit, climbing sometimes to quite a height. The very fine pinnæ and branchlets frequently take the outline of broadly oval leaves, and the greenish tint is overcast by glittering metallic blue. 50 cts.

denticulata. 20 cts.

Emiliana. An exquisite species, with densely tufted growth of the most delicate tracery. The light, fine cut branchlets take the form of oval or triangular fronds. The contrasts in shaded green are very fine, the tips of the young growth being a tender greenish white or yellow. 25 cts.

Lageriana. 25 cts.

Martensii variegata. 20 cts.

Pitcheriana. A choice species with crimson stems much divided near the top, and dense bright green branchlets of rather upright growth, forming a fine cut feathery mass. 25 cts.

Platyceriun alcicorne.

serpens. 25 cts.

viticulosa. A handsome stove species from Central America with bright green leaves about nine inches long. One of the most useful sorts. 25 cts.

General List of Stove and Decorative Plants

AGLAONEMA.

nebulosum. 50 ets.

pictum. Of dwarf, neat habit, with light green leaves, irregularly blotched with broad, angular patches of gray. 50 cts.

Roebbelenii. Fine leaves, beautifully marked with silvery white in a broad, feathery variegation. Only the center and edge of the leaves are plain light green. The plant is compact, free growing, with thick leaves as enduring as those of a rubber tree. A fine house plant. 50 cts.

versicolor. \$1.

ALOCASIA.

argyræa. New. \$2.

La Salliana. \$1.50.

macrorhiza variegata. A very strong growing variety, remarkable for the beautiful marbling of white on its large, bright green leaves and their white streaked footstalks. 75 cts.

metallica. Leaves rich bronze color on surface; purple beneath. A good variety for table decoration. From Borneo. \$1.

purpurea. 75 cts.

Sedeni. Leaves bronzy green, with distinct, ivory white

Thibautiana. Leaves deep olive grayish green; midrib grayish white, with numerous veinlets branching from it. From Borneo. This is the finest of the genus. \$1.

Veitchii. \$1.

Araucaria excelsa.—See page 62.

AMAGLYPTUS.

coloratus. A pretty, free growing trailer, with stiff leaves marked with silver above and purplish below. 35 cts.

IANANASSA.

sativa variegata. One of the best variegated plants for vases, etc. The leaves are from two to three feet long, green, broadly margined with rich, creamy yellow, tinged with red on the margins. \$3.

ANTHURIUM.

Andreanum. A brilliant variety, with a thick, leathery spathe of orange red, widely open, and a yellow spadix. The flowers are very lasting. \$1.50. crystallinum. 75 cts.

ferrierense. The flower spathes of this handsome variety are very large, about 5 inches long by 4 inches broad, and bright, glossy red, with a white spadix about 4 inches long. \$1.50.

Scherzerianum. A notably handsome standard, old variety, with large, brilliant scarlet spathes, orange colored spadices, and red stems. The shining deep green leaves are leathery, large and oblong. The plant is compact in growth and fine for house culture. \$1.

APHELANDRA.

orientalis punctata. Bright, yellow flowers; leaves veined and dotted with white. 50 cts.

Roezlii. Bright scarlet flowers, and curiously twisted, variegated leaves. 50 cts.

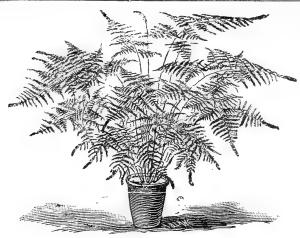

Anthurium Scherzerianum.

ARALIA.

Guilfoylei. A splendid variety from the South Sea Islands, with beautifully variegated leaves. 50 cts.

Sieboldii. A strong growing greenhouse species, with large, green leaves. Very useful as a house plant. 50 cts.

Asparagus plumosus nanus.

ARAUCARIA.

excelsa. The best known and most generally grown variety. Native of a cool southern hemisphere, it withstands a temperature anywhere above freezing, and retains its shape and color in a dark place better than almost any other decorative plant.

An admirable plant for hall or parlor. Five-inch pots, 12-15 inches high, \$2.00. (See illustration on page 61).

Aspidistra lurida variegata.

ASPARAGUS.

decorative plant, the finely divided foliage being especially useful for bouquets. Unequaled for house culture. 50 cts.

ASPIDISTRA.

lurida. A very graceful plant, with long, parallel veined leaves something like those of a Palm. 50 cts.

lurida variegata. Leaves marked with pure white. 75 cts.

BEGONIA, VARIEGATED-LEAVED SECTION.

argentea guttata. 25 cts.

Begonia Rex.

diadema. Leaves deeply cut, green, with silvery white spots.

The plant is strong growing, and soon forms a fine specimen.

25 cts.

metallica. 25 cts.

BEGONIA REX.

Asterei. 25 ets.

Comtesse Louise Erdody. Curiously beautiful leaves, with unequal lobes, one of them being elongated and twisted into a crown above the other. Center silvery, shading to a margin of coppery rose, deeper at the edge. 25 cts.

Duc de Brabant. Dark centered leaves with light green edges. A grand variety. 25 cts.

Dr. James. 25 cts.

Flora Hill. 25 cts.

Inimitable, 25 ets.

Kaiser Wilhelm. Ground color of older leaves dark velvety green, with center, veins and ruffled edges of dark maroon. The young leaves are light chrome green, brightly marked. A fine sort. 25 cts.

Louis Closson. Small metallic leaves, much marked with purplish gray; young leaves very bright. 25 cts.

Le Prousse. 25 ets.

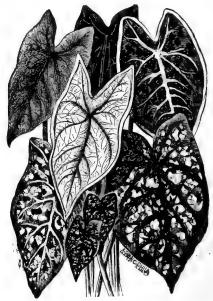

Marquis de Peralta. Quite distinct and attractive, and neat and compact in growth. The dainty leaves are rather small and short stemmed; dark, velvety olive green, with a wide broken band of silver round the center and a margin of dark green brightened with silver spots, that look as if embossed. 25 cts.

Minuie Palmer. 25 ets.

Mme. Siebold. 25 cts.

Mrs. A. G. Shepherd. Leaves nearly all silver, with a dark center of greenish maroon outlined by a dark green margin and ruffled edge of crimson. Very handsome and strong growing. 25 cts.

Perle Hunnefeldt. 25 ets.

Fancy leaved Caladiums .- See page 63.

President Carnot. 25 ets.

Surprise. A beautiful sport from Lucie Closson. The color next the leaf stem is reddish green, surrounded by a wide band of silvery white; the edge is alsoft, tender shade of yellowish green, spotted with white. 25 cts.

Tremideur. 25 ets.

Voie lactee. 25 cts.

BEGONIAS. Flowering. See Greenhouse Plants, page 71.

BERTOLONIA.

marmorata. Leaves of bright vivid green, beautifully marbled in irregular streaks of pure white; under surface deep rich purple. 75 cts.

Van Houttei. Deep green leaves veined with magenta, spotted with pink, and covered with silvery hairs. 75 cts.

BROMELIADS.

The Bromeliads are sometimes called Lobster Orchids, because like so many true Orchids they are air plants. The leaves are hard and thick, often curiously marked, and spiny on the margin. The long flower spikes attract less attention than the numerous large, bright red or yellow bracts with which they are intermixed, and which last for a long time.

In variety, \$1 to \$2.

CALADIUMS.

The fancy leaved Caladiums are now grown in large quantities for summer and fall decoration. They are a superb race of ornamentals, with leaves richly painted in all manner of colors and markings. Many of the varieties are of fine dwarf habit, and all have been greatly improved of late. (See illustration, page 62).

In variety, our selection, 25 cts. each, \$2.50 per doz.

CISSUS.

discolor. A beautiful and luxuriant climber. The sharp pointed heart shaped leaves are dark velvety green above, with broad markings of white following the veins; the under surface is deep reddish purple. 25 cts.

CROTON.

Aigburthiensis. 50 cts.

Albert Truffaut. New. Fine. \$1.

Andreanus. 35 cts.

angustifolium. 35 ets.

Baron Rothschild. 50 cts.

Charles Heine. 75 cts.

Chelsoni. 50 ets.

Dayspring. 50 cts.

Disræli. 50 cts.

elegans punctatum. 35 cts.

fasciatus. 35 cts.

Hanburyanum. 75 cts.

Hawkeri. 50 cts.

Hookeri, 50 cts.

interruptum. Long narrow leaves, spirally twisted. 35 cts.

Johannis. 50 ets.

Magnificent. New. Fine. 75 cts.

maximum. 35 ets.

nobile. 35 cts.

pictum. Rich crimson, blotched irregularly. 50 cts.

Prince of Wales. 35 cts.

quadracolor, 35 ets.

Reidii, \$1.

Sunbeam. 50 cts.

undulatus. 50 cts.

variegatus. Light green, marked with white. 35 cts.

viridis. Dark green with yellow midrib. 35 cts.

volutum. 50 cts.

Weismanni. 50 cts.

CURMERIA.

Wallish. A beautiful Aroid with fine broad green leaves, bordered with white and blotched with yellow on the upper surface. \$1.

CYANOPHYLLUM.

magnificum. A noble and effective foliage plant with very broad, thick, large leaves of velvety green and brownish purple. The veining is deep, and two deep nerves divide the area between the edge and the midrib. \$1.50.

CYPERUS.

alternifolius. Umbrella Palm. 25 cts.

laxus. 25 ets.

DICHORISANDRA.

musaica. A striking species, with trusses of bright azure blue flowers. The oval leaves are dark green above, profusely penciled and veined with zigzag, transverse lines of pure white; the under surface is deep reddish purple; stems checkered. \$1.

DIEFFENBACHIA.

Baraquiniana. 50 ets.

Bausei. Leaves yellowish green, margined and irregularly spotted with dark green and white. 50 cts.

Bowmanni. One of the best known and most useful species for decorative work. Leaves deep rich green, with almost parallel markings of pea green. 50 cts.

magnifica. 50 ets.

Memorae Corsi. Beautiful leaves of silvery white, with threadlike lateral veins of green. New and quite unique and distinct

Neo Guineensis. 50 cts.

nobilis. 50 ets.

Dieffenbachia picta.

picta. 50 cts.

Seguine picta. Light green leaves, marked with pellucid whit stripes; a fine contrast for darker sorts. 50 cts.

Shuttleworthii. 75 cts.

DRACAENA.

amabilis. Leaves glossy green, marked with pink and creamy white. 75 cts.

Anerleyensis. A very elegant little plant of special beauty and distinctness. The leaves are thick, broad, rounded, and very dark green, touched with pink and crimson on the edges. They sweep out thickly from the stem in graceful curves, the color brightening gradually to vivid tints in the young leaves unfolding at the top. The habit is neat and compact, and the plant very enduring. \$1.

Baptistii. 75 ets.

Cantrelli. 75 ets.

fragrans. 50 cts.

Gladstonel. A species remarkable for the rich, warm color of its leaves and stems. The young leaves are a bright wine color, deepening to greenish maroon, with crimson veining and edging as the texture becomes firmer. The growth is free and graceful. 75 cts.

Goldieana. Broad, green leaves, marked with cream white, narrow transverse blotches and stripes. The distinct, beautiful characteristics of the plant are well known. \$1.

imperialis. Leaves dark green, with yellowish spots and midribs, brightened by pink shadings and edgings in the young growth; habit erect and elegant; fine and striking. 75 cts.

indivisa. Very narrow leaves. 25 cts. to \$1.

Leopold Leclerc. \$1.

Lord Wolseley. One of the finest Dracænas of recent introduction. The leaves are of a firm substance, measuring from 2½ to 3 inches across, by 24 to 30 inches in length. The ground color is greenish maroon, margined and splashed with crimson. \$1.50.

Massangeana. \$1.

Norwoodiensis. \$1.

Dracana Sanderiana.

Reginæ. This variety has broad, curling leaves of dark green edged with pure white. Their texture is very thick and leathery, and their effect beautiful. The plant is compact and strong growing, clothing its stem thickly with leaves and forming beautiful specimens, 75 cts.

Robinsoniana, \$4.

Sanderiana. Quite a new departure in this valuable class of decorative plants. The stems are slender and upright, closely and gracefully set with thick textured, narrow leaves, from 3 to 5 inches long, of dark green, with longitudinal veins of white and a sharpely defined border of creamy yellow. \$1.

Schuldii. \$1. Shepherdi. 75 cts. stricta grandis. 75 cts. terminalis. 50 cts.

Ficus elastica.

FICUS.

elastica. This is the India Rubber plant, with large, shining plain green leaves. Few house plants will endure so much ill usage as this, and few are so handsome. 50 cts.

Parcelli. Large deep green, sharply serrate leaves, beautifully blotched and marbled with white and light green; very ornamental. 50 cts.

religiosa. Leaves smaller and narrower than in *F. elastica*, but of the same thick, glossy, ornamental character, and also quite as enduring. 75 cts.

repens. A pretty, small leaved creeper. 25 cts.

FITTONIA.

argyroneura. An evergreen trailer, with bright green leaves, netted with white. 25 cts.

Pearcei. 25 ets.

HELICONIA.

aureo-striata. A noble decorative plant, with large, oblong leaves of deep, glossy green, marked by curving parallel veins of yellow. \$1.

HIBISCUS.

Cooperi. A beautiful cool house plant. Leaves marked with white, pink and crimson; flowers scarlet. 35 cts.

tricolor. 35 ets.

HOFFMANNIA.

Ghiesbreghtii. 50 ets.

refulgens. Leaves of shining green, suffused with red above and deeper red underneath. 50 cts.

HOYA.

carnosa. The well known climber, with thick, waxen leave and clusters of pale pink, fragrant flowers. 35 cts.

variegata. 50 cts.

IXORA.

javanica. Flowers orange. 50 cts.

Westii. Bright red. 50 cts.

MARANTA.

alba picta. 50 cts.

argyrea. 75 cts.

bicolor, 35 cts.

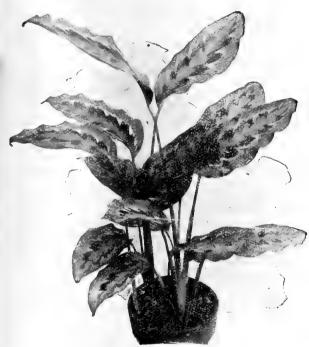

chimboracensis. 50 cts.

eximia. 50 cts.

Kerchoviana: Leaves short and grayish green, with a row of purplish blotches on each side the midrib. 35 cts.

Legrelliana. Very dark green leaves, relieved by a band of white. One of the finest sorts. 50 cts.

Leitzel. Leaves deep metallic green, with feathery markings; purplish violet beneath. 35 cts.

Maranta.

Lindeni. 50 cts.

Makoyana. A grand variety, with distinct markings. The outer margin of the leaves is deep green; the central portion is semi-transparent, with oblong blotches of deep green. 50 cts.

Massangeana. 35 cts.

medio picta. 75 ets.

micans. A small species of spreading habit, quickly forming dense and beautiful tufts. The leaves are dark shining green, with a white feathery stripe down the center. 35 cts.

princeps. 50 ets.

pulchella. Beautiful leaves, something like those of M. zebrina. Quite handsome. 50 cts.

roseo-lineata. Leaves marked with distinct lines of rose and vermilion. 75 cts.

smaragdina. A variety remarkable for its rich contrast in shaded green. The leaves are gracefully oblong and a fresh light green, with darker veins of velvety emerald green and a soft shading of the same beautiful color down the center. The undersurface is quite soft and pubescent. Very beautiful, 75cts.

Van den Heckei. 50 cts.

Wioti. 25 cts.

zebrina. "Zebra Plant." A well known variety, unsurpassed for general usefulness. Velvety leaves of light green, barred with greenish purple; under side dull purple. 50 cts.

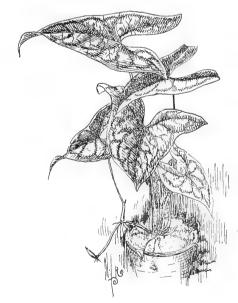

Nepenthes Rafflesiana.

MARCGRAVIA (Shingle Plant).

paradoxa. A beautiful and odd climber of an interesting subparasitical nature. The leaves are thick, round and waxen, overlapping each other closely and almost concealing the stem 50 cts.

NEPENTHES (Pitcher Plants).

Odd and interesting plants, with leaves modified into the form of pitchers at the tips. These hold water and drown insects, which are supposed to furnish nutrition

Nephthytis picturata.—See page 66.

to the plants, and thus they are called "carnivorous." The pitchers are of various shapes and sizes, most of them brightly blotched and veined with red and yellow. The leaves above the pitchers are glossy and waxen. \$2 each and upwards.

NEPHTHYTIS.

- triphylla. A pretty stove creeper with dark green, thrice divided leaves, marked with greenish white in the exact shape of the leaf. 50 cts. (See illustration on page 65).
- picturata. Dark green pointed heart shaped leaves; between the veins are Fern like variegations in silver. 75 cts.

PANAX.

Victorize. A pretty shrubby plant, native of the South Pacific Islands. The light green leaves are finely divided, and their edges are clearly defined with white variegation. 50 cts.

PANDANUS.

Baptisii. See New Plants.

- javanicus variegatus. A plant of great beauty. The leaves are long, narrow and variegated, slightly pendulous, and armed with white spines on the edges. \$1.
- **Veitchii.** Long, narrow, glossy leaves, beautifully striped with white. One of the best house plants; hardy, handsome and easily grown. \$1.

PANICUM.

variegatum. An elegant little plant for growing in baskets or edging large pots. The green leaves are striped with white and tinted with pink. 15 cts.

PELLIONIA.

Daveauana, 25 ets.

pulchra. A pretty creeper, with very dark veined leaves and purplish stems. 25 cts.

Philodendron.

PEPEROMIA.

argyreia. This is a choice variegated plant of fine habit. The broad rounded leaves are dark, shining green, and metallic stripes of silvery white run parallel with the midrib. 25 cts. metallica. 25 cts.

PHILODENDRON.

Carderi. One of the most brilliant leaved species. The leaves are heart shaped, delicate, satiny green, shaded with metallic olive on the upper surface; the under surface is pale green, ornamented with bands of maroon. The young leaves are bright chamois color, the maroon bands on the under surface showing through and producing a unique effect. 75 cts. spectabile. \$1.

PHRYNIUM.

variegatum. A beautiful plant for table decorations. The leaves are broadly oblong and light green, with broad, cream white bands and blotches. The habit is dwarf, neat and elegant. 50 cts.

PHYLLAGATHIS.

rotundifolia. A striking Melastomad, with large, broad, thick leaves of leathery texture. Near the margins the deep veins are crossed by still deeper longitudinal belts or nerves. Resembles Sphærogyne latifolia in general appearance, but has leaves rounder, more recurved, with veins more strongly marked, and its firmer texture better fits it for general cultivation \$1.

Pandanus Veitchii.

PHYLLOTAENIUM.

Lindeni. A beautiful Aroid of very striking appearance. The large Calla like leaves are dark, rich green, with broad veins, and midrib of pure white. 75 cts.

POTHOS.

argyræa. A beautiful climber, native of the Philippine Islands. The leaves are silvery green, mottled with white. Requires the same culture as Anthuriums. 50 cts.

aurea. 50 cts.

RUELLIA.

Devoniana. A very effective foliage plant. Deep green leaves, veined with white; purple underneath and having purple stems. 35 cts.

SANCHEZIA.

nobilis. A lovely stove plant from Ecuador, particularly attractive in form and habit. The leaves are glaucous green. striped with white. 35 cts.

SMILAX.

argyræa. This handsome variegated plant has all the graceful luxuriance of a robust climber. The leaves are from 5 to 6 inches long by 2 inches wide, very bright and glossy green, richly and irregularly marked with large silvery blotches. 50 cts.

SONERILLA.

Hendersoni. A beautiful dwarf growing greenhouse plant, with silver, variegated leaves. 50 cts.

SPHAEROGYNE.

latifolia. Leaves broad and massive, ovate in general outline, and marked with a network of sunken veins, crossed by deep nerves. One of our finest large leaved ornamentals. \$1.50.

STENANDRIUM.

Lindeni. One of the most richly covered foliage plants among our novelties. The growth is neat and compact, though robust and free. The leaves are broad and rounded, and have a velvety appearance. 50 cts.

STROBILANTHES.

Dyerianus. This beautiful house and bedding plant has been the sensation wherever exhibited. The leaves are from 3 to 4 inches wide, bright metallic or peacock blue, shading into light rose, and margined with silvery green. 20 cts.

TRADESCANTIA.

Reginæ. This beautiful plant is entirely novel in habit of growth, which is quite robust and almost upright. The leaves are broad, sharply pointed, closely set upon the stems, and beautifully colored. 50 cts.

Water Lilies.

No plants have acquired such universal appreciation within so short a period as Aquatics. The flowers are most fascinating, interesting and beautiful, and none can be grown with less trouble and risk of failure.

The hardy varieties may be planted as soon as vegetation commences in the spring. If not convenient to grow them in a pond or lily tank (which is preferable), they may be grown in tubs, several varieties being well adapted to this mode of cul-The tubs may be ture. plunged in the ground or stand on the level, as the grower may determine. A warm sheltered position, yet with full exposure and sunshine, should be selected. Fill the tubs two-thirds full of turfy soil enriched with decomposed hotbed or farmyard manure; cow manure is very desirable; cover with two inches of sand and fill with water. The crowns of the plants should be placed

just under the surface of the soil. The tropical varieties are admirably adapted for out of doors in summer, if planted at the approach of warm weather, before which time they can be grown indoors in pots set in tubs of water. In planting Nelumbiums give them more root room than Nymphæas; if grown in tubs, two or three inches of water will suffice. Those marked (*) are suitable for growing in tubs.

HARDY AQUATICS.

Nelumbium speciosum (Egpytian or Sacred Lotus). This grand Lotus is perfectly hardy and is one of the loveliest of Water Lilies. The flowers when just expanding are of a beautiful rosy pink color; when open they are of a creamy white and pink and are very fragrant. It is a very interesting plant and has been an immense success everywhere. Strong roots, 75 cts.; extra size, \$1.50.

Nelumblum speciosum roseum. Flowers of a uniform deep rose pink color, much darker than the preceding. \$1.50.

Nelumbium luteum (American Lotus). There is scarcely any difference between this and N. speciosum, except in the color of the flowers, which are of a rich sulphur yellow. Still, warm water and rich soil are the conditions for success with these noble plants. Strong roots, 75 cts.; extra size, \$1.50.

Nymphæa alba candidissma. This is a large flowered variety of the English Water Lily; large, white flowers; a continuous bloomer, and very desirable. \$1.

Nymphæa Marliacea chromatella. A charming variety and probably the best yellow Water Lily in cultivation. The habit of the plant is like N. candtdissima, flowering freely the entire season. 75 cts. each; \$7.50 per doz.

*Nymphæa mexicana. This variety is far superior under cultivation to N. flava, with which variety it is identical; its continuous and free flowering qualities, and its rich yellow flowers, place it in the front rank; it is also hardy in northern New Jersey. 50 cts.

*Nymphæa odorata. The well known white fragrant pond Lily. 20 cts. each; \$2 per doz.

Nymphæa odorata gigantea. A southern form of the preceding variety, having larger flowers and leaves; a desirable variety. 20 cts. each; \$2 per doz.

Nymphæa odorata rosea (Cape Cod Water Lily). the best pink hardy Nymphæas, and worthy of very wide cultivation; it possesses all the desirable qualities of the white flowered species, hardiness, freedom of bloom and delicious fragrance. 75 cts. each; \$7.50 per doz.

Nymphæa pygmæa helvola. A yellov Lily, very free flowering; a great acquisition. \$1. A yellow pigmy Water

TENDER AQUATICS.

Nymphæa dentata. The largest white with long pointed buds, rich deep green leaves; a vigorous and free blooming buds, rich devariety. \$1.

Nymphæa Devoniensis. Brilliant rosy red. very large, often ten to twelve inches across; one of the best. \$1.

Nymphæa rubra. Somewhat resembling N. Devoniensis; flowers brilliant crimson, cup shaped; very free bloomer. \$1.

*Nymphæa zanzibarensis azurea. Deeprich azure blue; very free and continuous bloomer; delicately scented. One of the largest and best. 75 cts.

*Nymphæa zanzibarensis rosea. This is like N. zanzibarensis in every respect, except that the flowers are a beautiful deep rose color. 75 cts.

Water Hyacinth (Pontederla crassipes). Very interesting and beautiful; floats on the surface of the water, and produces fine spikes on light, rosy lilac, Orchid like flowers. 15 cts. each; \$1.50

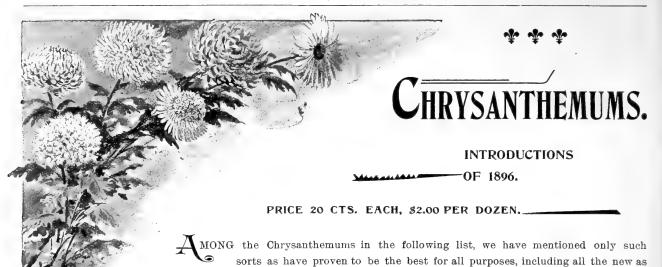

Water Poppy (Limnocharis Humboldtii)). clear yellow, Poppy like; must be grown in shallow water; very attractive. 15 cts. each; \$1.50 per doz.

Water Snow-flake (Limannthemum indicum). In growth the plant resembles a Water Lily, with leaves from three to five inches across; the flowers are white, about as large as a fifty cent piece; the upper surface of the petals is covered with a delicate fringe, giving them the appearance of crystal, star shaped snow flakes. 25 cts.

*Parrot's Feather (Myriophyllum proserpinacoides). Very graceful and desirable plant. Its long trailing stems are clothed with whorls of the most exquisite foliage, as finely cut as the leaves of the Cypress Vine, and much more delicate. 15 cts. each; \$1.50 per doz.

*Egyptian Paper Plant (Papyrus antiquorum). Produces a number of slender stems surmounted by dark green shining plumes. 25 cts. and 50 cts.

*Umbrella Plant (Cyperus alternifolius). This, with the preceding, are the most desirable Aquatic plants; will grow in water or damp places, always presenting a green and attractive appearance. 15 cts. and 25 cts.

well as best standard varieties. So popular has the Queen of Autumn become that it is not

necessary to expatiate here on their beauty and usefulness as autumn flowering plants.

Alonzo. A beautiful shade of clear, pearly pink; incurved. Good for all purposes.

Amaranth. A reflexed variety of considerable depth; white, heavily shaded with amaranth: late.

Clarance. Large, double, incurved flower; intense bright red inside, with real golden reverse.

Constance Terrell. Fine Japanese yellow (type of Viviand-Morel), with good foliage well up to the flower; flower full and double and very lasting; dwarf growing, making it fine for pot culture; mid season.

Governor Matthews. A globular, incurved form of large size; color pearly pink; mid season.

Henry Hurrell. Closely incurved yellow Japanese. Flower very large and lasting; stem and foliage excellent. Unsurpassed as an early flowering, dwarf growing variety.

Indiana. Incurved, clear, bright pink within, a lighter shade without; immense globular flowers.

Infatuation. Clear white, changing to creamy white with age; a new and distinct type.

Lenawee. Incurved Japanese of the purest white, resembling the Queen, but surpassing that variety.

Marion Cleveland. Immense ivory white bloom, shading delicate lemon toward the center.

Miss Agnes Louise Dalskov. "Pink Ivory." This handsome sort is a pink sport of Ivory, and is identical in growth and shape of flower with the old, well known variety; the only difference is in the color, which is a beautiful pink.

Miss Helen Wright. Pure ivory white when in perfection, gradually assuming the faintest tint of pink with age; an ideal flower in every way.

Miss 1. Magee. Early incurved Japanese, with strong stem, well furnished with foliage. Very vigorous grower, producing large, full flowers of a beautiful light pink color. Excellent for exhibition purposes.

Miss M. Lear. A fine Japanese incurved, full and double. Flower maroon red and does not fade; good stem, well furnished with foliage; mid season. Makes good specimen plants, as it is a very free grower; the best maroon red in existence.

Modesto. Intense in color, unsurpassed in size, incurved, slightly whorled form, with very high full center. Mongolian Prince. True incurved Chinese, with large flowers of a golden bronze color; fine, stiff stems, with foliage well up to the flower; dwarf, but very vigorous grower; mid season.

Mrs. C. B. Freeman. Beautiful clear yellow, identical with L. Bæhmer except in color.

Mrs. Harry Toler. Extra large Japanese, with excellent stem and foliage. Flower flesh pink, slightly hairy, full and double; mid season. Very vigorous grower, and with ordinary culture will attain a great height.

Mrs. H. H. Battles. Large incurved Japanese, white shading to blush at base.

Mrs. J. Peabody. Very large, pure white, of extra fine build and finish. Fine for exhibition.

Mrs. Perrin. Globular incurved; very bright rose pink. Fine shipper.

Mrs. R. Crawford. Extra large, clear white, the shape of tory, but much larger; color same pearly tint.

Mrs. Wm. C. Egan. A large early variety, crimson pink at the base, shading at the apex to pale sulphur, suffused with strawy buff on outside of petals. An excellent keeper.

Mrs. Wm. P. Raynor. Beautiful clear white Japanese

Nanshon. A magnificent mid season white.

New York. Very large, incurved Japanese; white.

Pluto. A fine, bold, globular flower of a bright red color, reverse bright golden. All except center petals are reflexed.

Riverside. Clear, canary yellow; flower large and reflexing in form. Early.

Sibyi Kaye. Extra early Japanese; silvery pink.

Tippecance. An incurved variety of a peculiar type; the florets are tubular, with an open flare at the ends; inside a pink terra cotta, with light reverse.

Violescent. Very large white, with lower petals delicately tinged lavender. Fine for exhibition.

Violet King. Japanese; dark pink, shading to violet.

Yanoma. Very late, reflexed white, somewhat like Viviand-Morel.

Brandon, Vt., Nov. 8, 1896.

All the articles sent by you reached me in safety, as well as your generous premium, for which I am much obliged.

The plants received in fine order. I am more than pleased with their size and healthy condition. Thanks for the premium, which seems excessive. S. G. PARDESSUS.

Standard List of Chrysanthemums.

Price, 15 cts. each; \$1.50 per dozen.

- Charles Davis. A golden sport from Viviand-Morel; light yellow suffused with rich apricot; grand flowers of great size.
- Col. Wm. B. Smith. Large, high and double; golden bronze; fine for exhibition.
- Daisy. Fine single; white, yellow center. Grand for specimens.
- **Dean Hole.** White, shaded with pink; massive broad petaled flowers. Mid season.
- **Dorothy Toler.** Beautifully formed flowers of a warm rose color, tipped with red; of medium size; good stems and foliage.
- Erminilda. Outer petals reflexed, inner incurving; rose pink; yery fine.
- Eugene Dailledouze. Magnificent flowers of pure golden yellow; globular, lasting, stem and foliage fine; growth free.
- George W. Childs. Deep crimson, without shade of brown. The best of its color.
- Georgienne Bramhall. Beautifully formed flowers of pale primrose yellow; habit, form and foliage good; early.
- Golden Gate. Large, petals broad, reflexed; canary yellow; fine for exhibitions.
- Golden Wedding. Immense flowers of brightest yellow.
- Harry L. Suuderbruch. Large, clear bright yellow; fine for exhibition.
- H. W. Rieman. Deep, bright golden yellow, massive and crowded with petals.
- Imperial Castle. Very large, full, double; pure white;
- Ivory. Pure white, incurved. A fine old favorite.
- J. E. Lager. A very early yellow reflexed Japanese of good size, color and substance. Foliage and stems good.
- J. H. Troy. A very early white incurving Japanese of fine form; good size, color and substance.
- John Shrimpton. Velvety crimson scarlet, with reverse of gold.
- Lady Playfair. Pearl pink, of large size and splendid proportions; very early.
- Latest Fad. Huge, odd flowers, with cord like petals falling gracefully about the stem; yellow, striped with bronze and
- L'Enfant des Deux Mondes. Clear yellow, passing to pearl white; a beautifully formed and colored variety, with incurved center.
- Louis Boehmer. Silvery pink.
- Major Bonnaffon. Soft, clear yellow; similar to Ivory in form.
- Marion Henderson. Bright yellow; early.
- Marie Louise. White, petals interlaced.
- Maud Dean. Very large, petals broad and incurving; pink; excellent for all purposes.
- Mayflower. Large, pure white flowers; early, fine for exhibitions.

- M. B. Spaulding. Very large, extremely double; lemon yellow.
- Minerva. Massive flowers of a clear vivid yellow.
- Miss Florence Pullman. Of medium height, with closely set dark green foliage and stout stem. Flowers enormously large and high built, with broad, pure white petals; fine for exhibitions; early.
- Miss Georgiana Pitcher. Fine yellow variety of dwarf habit; flower incurved, of good size, fine color, and great substance.
- Mme. F. Bergmann. Pure white, very early.
- Mr. Hicks Arnold. Full double; old gold, when wide open almost spherical. The freest growing variety known, and one of the most floriferous.
- Mrs. A. J. Drexel. Double, hemispherical; crimson lake.
- Mrs. Alpheus Hardy. White, the first of the hairy varieties.
- Mrs. E. G. Hill. Grand, full flowers of clear, pearl pink; stems stiff, extra early; bas received many honors.
- Mrs. George J. Magee. A grand exhibition variety of dwarf habit, with close set leaves and stout stems. Flowers globular, very double; a distinct shade of pink.
- Mrs. George M. Pullman. Very early and striking in color, with stout stem and luxuriant foliage. Flowers very large rudely reflexed, deepest golden yellow.
- Mrs. George West. Very strong growing, with strong stem, and fine foliage. Flowers of immense size, with broad petals of rose pink, shaded rose purple.
- Mrs. Henry Robinson. A perfect form of the Queen of England type; of exceptional merit, large and well finished. An early white, of fine substance and very lasting.
- Mrs. Higginbotham. Enormous rich, bright pink flowers of the broad spreading Japanese type.
- Mrs. H. Mck. Twombly. A grand early variety of dwarf habit, with rich green foliage and stiff stems. Flowers large, perfectly formed; pure white, penciled with pink.
- Mrs. Howard Rinek. Very large flowers of rich rose color, well built and slightly hairy; fine for exhibitions.
- Mrs. James B. Crane. Rich deep rose colored flowers of large loose form, reminding one of a Pæony. Strong growing; very early.
- Mrs. Jerome Jones. White, flamed with rose; late.
- Mrs. S. F. Murdock. Lasting flowers of light rose pink; strong stems.
- Mrs. W. A. Bryant. Fine chrome yellow; a magnificent flower, with broad petals. Mid season.
- Mutual Friend. Pure white; petals long, large.
- Nemesis (Daybreak). Very early; has the pure dainty coloring of Daybreak Carnation.
- Niveus. Grand snow white variety.
- Philadelphia. Majestic globular flowers formed of stiff, broad white petals, charmingly illumined on the tips with soft lemon yellow. Stems and foliage superb.
- Pitcher & Manda. Plant of dwarf, fine habit; flowers very large and regular, central petals canary yellow, outer five or six rows pure white. Very novel and distinct in color.

EVANSTON, Ill., March 20, 1896.

Orchids and other plants ordered on 16th arrived in excellent condition. They were all splendid, healthy plants, and were packed so perfectly that on unpacking there was not a leaf or bud broken. I wish also to thank you for the extra plants sent.

JOSEPH HOBBS.

TENBY, England, March 30, 1896.

I beg to acknowledge your favor of 18th, and to say that the plants came safely to hand on the 20th in beautiful condition. The California Violets received last year have given a good many strong runners.

I. QUARTERMAIN.

STANDARD CHRYSANTHEMUMS-Continued.

Rose Wynne. Large white, shading to pink.

Souv. de Mme. Bonillier. Deep crimson, tipped yellow; full and double.

Sunrise. Bright terra cotta, with reverse of gold; semi incurved; very early.

The Queen. Extra large, semi globular; pure white.

Viviand-Morel. Tender silky rose.

W. B. Dinsmore. Japanese incurved, golden yellow. Flowers well built and very attractive. Strong stem, with good foliage and petals of great substance.

William H. Lincoln. Large, yellow, with straight, flat petals.

Yellow Hammer. Flower large, bright chrome yellow; ray florets broad, slightly twisted, two rowed.

Yellow Queen. Very early; clear bright yellow.

Hardy Chrysanthemums.

These Chrysanthemums, though in no way new, have not received in past years the attention they deserve, especially for planting in private gardens where many of the large flowered varieties do not mature their flowers before the cold weather sets in. We have made extensive trials, securing the best that could be found in Europe, Japan and this country, and offer the following selected varieties.

Price, 15 cts. each; \$1.50 per dozen. The set of three dozen for \$4.00.

Adonis. Rose purple flowers.

Aurore Boreale. Bronze and orange.

Blanche Colombe. Pale yellow; very dwarf.

Comte de Morny. Bright purple.

Emily Rowbottom. Lovely cream white sport from Marie Stuart.

Eugenie Lanjaulet. Orange yellow.

Eynsford Gem. Crimson.

Fiberta. Canary yellow; good habit.

Frederick Pele. Deep crimson, tipped gold.

Golden Circle. Bright yellow.

Grace Darling. Lilac, blush center.

Kyrle Bellew. Crimson and yellow.

L'Ami Conderchet. Sulphur white; very fine.

La Liliputian. Pink.

La Paranace. Rose pink; fimbriated.

La Purete. White.

Little Bob. Bright crimson; small flower.

Little Pet. Crimson, tipped yellow; very small, fimbriated.

Lune Fleurie. A small, orange yellow variety.

Maid of Kent. White

Marion. Flowers intense orange.

Mme. Sentir. White anemone.

Mr. Astie. Golden yellow.

Mrs. Cullingford. Blush white, one of the best.

Nellie Rainford. Buff.

Perle. Rose lilac, pale rose disc.

Piercy's Seedling. Bronze, shading to yellow; one of the best.

President. Rosy carmine.

Regulus. Cinnamon.

Reine des Anemones. Pure white.

Rosinante. Blush rose; dwarf grower.

Cluster of Hardy Pompon Chrysanthemums.

St. Crouts. Light pink; small flowers; very free blooming.

Strathmeath. A distinct shade of rose pink.

Tiber. Crimson brown, tipped yellow.

Trevenna. Go!den yellow.

Victorine. Dark brown.

GARRETTSVILLE, O., Nov. 9, 1896.

The package of bulbs came to hand to-day, and I hereby wish to thank you for your generosity in premiums and extras, as well as for your first class bulbs.

F. A. GANONG.

BOSTON, Mass., Apr. 4, 1896.

I am much pleased with my plants and seeds, which arrived safely the 3d. Thanks for promptness.

MARY S. P. GUILD.

Greenhouse Flowering and Bedding Plants.

In this department we include a great variety of plants that thrive in cool or changeable temperatures, the majority of which may be grown even by the amateur without a conservatory. The greater portion can be used for outdoor embellishment during the summer months.

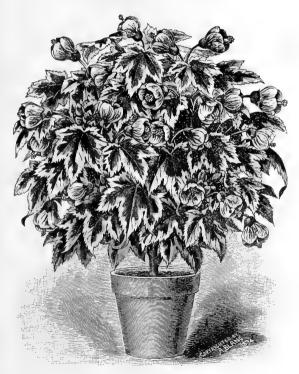

ABUTILON.

Beisham. A beautiful variety with Maple like foliage. Strong, vigorous grower; red, bell shaped flowers veined with maroon. 15 cts.

Boule de Neige. Beautiful white flowered variety, with heart shaped leaves deeply serrated; good, strong grower and free flowerer. 15 cts.

George's Hybrid. Flowers yellow, beautifully veined with red; Maple like foliage. 15 cts.

Golden Fleece. Flowers yellow, of immense size and produced in great profusion almost the entire year. 15 cts.

Abutilon Souvenir de Bonn.

Souvenir de Bonn. A striking new variety that, in addition to its bright orange colored flowers, is valuable as a decorative foliage plant. The leaves are large and dark green, broadly and evenly edged with white. 15 cts.

Thompsoni plena. A variety with golden spotted leaves, upright, tree like habit, and double orange flowers. 15 cts.

vexillarium. Flowers yellowish, with dark center; habit creeping. Excellent for vases, etc. 15 cts.

ALLAMANDA.

neriifolia. A bush form of Allamanda with deep golden yellow flowers. 35 cts.

AZALEAS.

These handsome, petite greenhouse shrubs we grow in great variety, including the choicest colors and newest sorts in cultivation. They rank among the most popular winter and early spring flowering plants, are very easily grown, and will give very satisfactory results with but very little care. 75 cts. each and upward.

Azalea indica.

BEGONIAS, Flowering.

acuminata. A very free flowering variety having, beautiful pink flowers. Foliage light green, narrow, branching, deeply serrated. 15 cts.

alba picta. Very distinct species, with glossy green leaves freely spotted with silvery white. Shrubby in habit and of compact growth. 15 cts.

Begonia fuchsioides .- See page 72.

argentea guttata. A tall growing variety, with light green leaves having numerous silvery spots; the under side is red. 15 cts.

BEGONIAS, Flowering-Continued.

corallina. Flowers bright coral red. 15 cts.

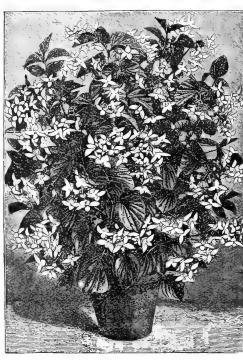

Duchartre. A strong free grower with abundant foliage Blooms in large panicles, on extra long stems, somewhat resembling B. metallica, but much larger, of glistening texture; buds pink, blooms white 25 cts.

Erfordiæ. Very dwarf and bushy, about 15 inches high, and continually covered with clusters of rosy carmine flowers. Does not suffer from drought. 15 cts.

Feastii. Dark green glossy foliage; pink flowers. 15 cts.

fuchsioides. Has the appearance of a Fuchsia. Foliage deep green; flowers bright red, hanging in clusters. 15 cts. (See illustration on page 71.)

Gloire de Juoy. Very beautiful variety, with green leaves profusely spotted with silvery white and veined with red; of compact growth and very free flowering. 25 cts.

Begonia incarnata.

Gloire de Sceaux. Lustrous leaves of dark green, tinged red; flowers pink. A very handsome and free blooming bedder. 20 cts.

Haageana. Leaves large, bronzy green above and red below; flowers of the largest size. 35 cts.

incarnata. Large, rose colored flowers borne on erect stems; leaves light green. Splendid also for cut flowers in winter. 15 cts.

La Neige. Leaves green, profusely spotted with small silver white dots; flowers light pink. Fine either for bedding or window culture. 20 cts.

metallica. Crimson and maroon foliage produced on erect stems. Very fine flowers. 15 cts.

Mme. de Lesseps. Leaves like B. argentea guttata, but much larger; pink flowers. 20 cts.

Mme. Lennet. A good bedding variety. Leaves metallic rosy bronze, covered with a crimson pubescence; flowers pink. 25 cts.

Olbia. Very handsome leaves. 25 cts.

Paul Bruant. Clusters of beautiful pink flowers. 25 cts.

Saundersonii. Scarlet flowers; dwarf habit. Constantly in bloom. 15 cts.

semperflorens rosea. The true ever blooming species. Blooms to perfection every day in the year. Flowers dark red in the bud, carmine pink in the flower. 15 cts.

Thurstoni. Pink flowers and metallic foliage. 20 cts.

BOUVARDIA.

Alfred Neuner. Large double white flowers, composed of three rows of perfect petals of the purest waxy white. 20 cts.

Davisoni. White, often tinged pink; a standard white variety. 20 cts.

elegans. Extra sized flower of a light scarlet carmine color; one of the best single varieties. 20 cts.

Hogarth fl. pl. A beautiful double variety, with light, scarlet carmine flowers. 20 cts.

Humboldtii corymbiflora. Flowers pure white, 3 inches long, 1½ inches across, delightfully fragrant, appearing in autumn. 25 ets.

CALLA.

Dwarf Calla. "Elliott's Little Gem." 15 cts. each, \$1.50 per doz.

New Rochelle, N. Y., Dec. 28, 1895. I received the bulbs and plants in good order. I never had such good value in plants by mail as in the Pelargo-

niums you sent me.

JULIA C. EMMET.

BROOKLYN, N. Y., May 6, 1896
Plants received to-day. We are well pleased, and thank
you very kindly for extras.

HENRY KURZ.

Storrs, Ct., Dec. 10, 1896.

Plants received this day in fine order. All very satisfactory, in some cases exceeding my expectations.

A. G. GULLEY.

ENGLEWOOD, N. J., May 22, 1896.

The small order I sent you has been received, and I take pleasure in calling your attention to my appreciation of the very thorough and business-like way in which you have dealt. Each article ordered has come, and, in addition, valuable extras. I regret that I did not send you, at the commencement of the season, my entire order.

ROBERT KERR.

HAVERHILL, Mass., Oct. 30, 1896.
The Palms arrived in good condition, and am well pleased with them.
G. H. HILL.

§2.50 per doz.

Comtesse Olivier de l'Etoile. Foliage glaucous green; flowers chrome, dotted carmine. 15 cts. each, \$1.50 per doz.

Edouard Andre. Foliage dark brownish green; flowers large, deep carmine. 15 cts. each, \$1.50 per doz.

Eldorado. Almost a pure yellow, very finely speckled with red; habit dwarf, growing only about 3½ feet high; plant sturdy and compact. 25 cts. each, ~2.50 per doz.

Explorateur Crampbel. Flowers of good size, borne on stiff stems well above the foliage, bright blood red in color, with oval dots of crimson; foliage green. 15 cts. each, \$1.50 per doz.

F. Neuvessel. Large rosy carmine flowers shading into cerise. 15 cts. each, \$1.50 per doz.

Flamingo. One of the finest crimson varieties, strong and compact in growth, growing to a height of about 3 feet; the flowers are large and cluster around the stem in an even manner. 35 cts. each, \$3.50 per doz.

F. L. Harris (Pitcher & Manda). A grand, strong growing Canna, with broad, massive leaves of glaucous green. Flower spikes numerous, large and showy, with broad petaled florets of deep blood red. One of the most striking bedders yet introduced. 3 to 4 feet high. Awarded medal and diploma at the World's Fair. 15 cts. each, \$2.50 per doz.

Florence Vaughan. One of the finest of the yellow spotted varieties. The petals are very wide, rounded at the ends, rich golden yellow, spotted with bright red; foliage is large, of a rich green color. 15 cts. each, \$1.50 per doz.

General Boulanger. Leaves dark green; flowers canary yellow, mottled and streaked with crimson scarlet. 15 cts. each, \$1.50 per doz.

of golden yellow in center. 15 cts. each, \$1.50 per dozen.

Columbia. A bright crimson, with very deep orange crimson markings; strong and symmetrical grower, with rich green foliage; height 4 feet. 25 cts. each,

General de Miribel Very dwarf, with beautiful clear green foliage and enormous flower clusters of rich, soft apricot salmon; a very desirable variety. 20 cts. each, \$2 per doz.

I. Montel. Foliage dark green; flowers a beautiful dark crimson. 15 cts. each, \$1.50 per doz

 $\begin{array}{cccc} \textbf{Ingenieur} & \textbf{Alphaud} . & \textbf{Foliage deep purple}; & \textbf{flowers large,} \\ & \textbf{carmine.} & \textbf{15} & \textbf{ets.} & \textbf{each,} \ \$1.50 & \textbf{per doz.} \end{array}$

L. E. Bally. Flowers light canary yellow spotted with orange; petals broad. A strong grower and very desirable. 15 cts. each, \$1 50 per doz.

Marquise Arthur de l'Aigle. Foliage green; flowers well opened, large, bright red, except at base and margin, where they are yellow tinted. 15 cts. each, \$1.50 per doz.

Maurice Musy. Of strong habit; flowers clear, rose lake. 15 cts. each, \$1.50 per doz.

M. Desport. Fine orange colored flowers; large foliage. 20 cts. each, \$2 per doz.

M. Forgeot. Flower spikes very long and numerous, thickly set with large, bright orange flowers clearly bordered with yellow; rich green foliage. 20 cts. each, \$2 per doz.

Mme. C. Riviere. Flowers canary yellow, mottled with crimson; habit of growth tall. 15 cts. each, \$1.50 per doz.

CANNAS, DWARF-Continued.

Mme. Crozy. This variety has become the most popular of the large flowering Cannas. The plant is of a dwarf habit, rarely growing over four feet in height, but it has a very vigorous constitution. The foliage is a vivid green, broad and massive. The flowers, which are borne in large clusters, in great profusion, the entire summer, are brilliant scarlet, bordered with golden yellow, making a grand combination of colors. 15 cts. each, \$1.50 per doz.

Nardy Pere. Foliage green, tinted purple; floriferous; flowers large, bright red. 15 cts. each, \$1.50 per doz.

Paul Bruant. A strong growing variety; flowers bright flame color. 15 cts. each, \$1.50 per doz.

Paul Marquant. A most distinct and beautiful variety and an exceedingly free bloomer. It has an abundance of very handsome, dark green foliage; flower spikes are very large, bright salmon scarlet with silvery lustre. 15 cts. each, \$1.50 per doz.

Paul Sigrist. Style and habit of Mme. Crozy, with flowers nearly as large; color rich, dazzling crimson, golden yellow border. 15 cts. each, \$1.50 per doz.

Professeur Gerard. This variety has handsome, dark green foliage, with purple edges; flowers are bright, cherry red, borne in large, compact trusses. 15 cts. each, \$1.50 per doz.

Queen Charlotte. A brilliant novelty of German introduction, dazzling in its color effects. The large broad petals are deep velvety crimson, distinctly bordered with a broad edge of golden yellow. Spikes large, shapely, and densely set with flowers. Leaves handsome; plant dwarf, sturdy, branching; continually in bloom. 20 cts. each, \$2 per doz.

William Elliott. A grand variety, with beautiful foliage of bronze red, veined and lined with crimson. 15 cts. each, \$1.50 per doz.

CARNATIONS.

Alaska. Pure white. A seedling from Lizzie McGowan, but possessing a much more vigorous habit, Plant grows erect, is self sustaining, and an abundant bloomer; flowers are symmetrical, of excellent quality. 15 cts. each, §1.50 per doz.

Bridesmaid. Large sized flowers of a clear bright pink, borne on very strong, stiff stems; calyx good and not inclined to burst. An exceptionally vigorous grower. 15 cts. each, \$1.50 per dozen.

Daybreak. Delicate salmon pink. Medium to large flower, borne on strong stiff stems.
Vigorous grower, but should not be grown too warm. 15 ets. each; \$1.50 per doz.

Lizzie McGowan. The best pure white Carnation. Large, full snowy flowers; moderately vigorous grower, ranking with the most productive flowering varieties. 10 cts. each, \$1 per doz.

Meteor. Brilliant crimson scarlet. Medium sized flower on a firm stem; vigorous grower, with clean foliage; good bloomer. The finest dark sort known to date. 10 cts. each, \$1 per doz.

plat

fair tr

Mme. Diaz Albertini. Flowers very large; center full and well built up; petals finely fringed; shape of the flower very symmetrical; general effect of color and form decidedly pleasing; moderately free bloomer. One of the chief attractions of this variety is its clove fragrance. 10 cts. each; §1 per doz.

Portia. Scarlet. This variety is so well known that it hardly needs any further description. Very free growing and flowering variety, unsurpassed in color. 10 cts. each, \$1 per doz.

W. D. Sloane. Flowers large, a beautiful cerise, borne very freely on long, stiff stems; strong grower, of an upright habit, with dark green foliage about as heavy as Tidal Wave. 15 cts. each, \$1.50 per doz.

William Scott. Bright pink. Undoubtedly the most productive and even colored Carnation that we have thus far grown. Flowers medium to large, borne on long stems of fair to good stiffness. Very healthy grower, and an early, constant, prolific bloomer. 10 cts. each, \$1 per doz.

CHORIZEMA.

ilicifolia. A beautiful shrub with small, holly like leaves and yellow flowers. 25 cts.

CHRYSANTHEMUM.

For Perennial Autumn Flowering Varieties, see pages 68, 69 and 70.

Etoile d'Or. Single yellow flowers. 15 ets.

frutescens. The white Marguerite, or Paris Daisy. 15 cts.

COLEUS.

Alhambra. Velvety crimson, veined maroon.

A. L. Marshall. Lavender center, margined with white, the outer edge being a deep, rich green.

Attraction. Brown, yellow, maroon and green.

Dazzler. Rich crimson, edged green..

Firebrand. Maroon, shaded red.

Firecrest. Crimson, blotched bronze.

Fitzpatrick. Mottled yellow and red.

Glory of Autumn. Crimson, edged green.

Hero. Dark plum color.

John Goode. Green and yellow.

Mrs. D. I. Haight. Yellow; fine bedder.

Mrs. Watts. Olive green, broad pink border spotted crimson.

Rob Roy. Crimson.

Verschaffeltii. Best red.

Vick's Gem. Red, with yellow margin.

Yellow Queen. Fine yellow.

Yellow Verschaffeltii. Yellow form of the well known Verschaffeltii.

Price, 10 cts. each, \$1 per doz.

CUPHEA.

hyssopifolia.

Llavæ.

"Cigar Plant." Flowers red, tipped with platycentra. white.

Price, 10 cts. each, \$1 per doz.

FRANKFORT, Ky., Oct. 25, 1896.

I write to thank you for the generous manner in which you filled my order this fall. The bulbs arrived in good condition, and the extras were all that could be desired.

MINNIE SCOTT.

Bellevue, Pa., Apr. 30, 1896.
Duplicate lot of plants received in fine condition. Such fair treatment is deserving of further patronage, but I have my requirements for this spring.

D. S. TILLEY

CYCLAMEN.

We have a very choice large flowering strain that produces flowers of a very fine type, in all the best colors. 50 ets.

ERICA.

mediterranea, 50 cts.

nigrescens. 50 cts.

FUCHSIAS.

Black Beauty. Red and pink.

Black Prince. Carmine and pale pink.

Carl Holt. Red and white striped: single.

Elm City. Very dark red and crimson; dwarf.

Mme. Bruant. Mauve lilac, spotted and veined with rose; sepals bright red. Plant vigorous, flowering the entire season.

Mme. Thibaut. Showy deep red.

Mrs. E. G. Hill. Bright red and pure white; very large; double.

Perle von Brunn. Red and white; double.

Price, 10 cts. each; \$1 per doz.

GARDENIA.

florida. "Cape Jessamine." We have no handsomer greenhouse shrub than the Gardenia, with its thick, shining leaves, and great waxen cream white flowers. The fragrance is delightful and subtle. 50 cts.

GENISTA.

racemosa. 50 cts. and upward.

GERANIUMS.

Standard Zonal Varieties.

DOUBLE.

Comtesse de Castrice, Rose pink.

Dr. Dujardin Beaumetz. Rich scarlet.

Edouard Douglade. Cerise.

Emile Faguet. Scarlet.

General de Boisdeffre. Large blush pink.

Hedwig Buchner. White; large truss.

Heteranthe. Scarlet; splendid bedder.

Lady Roseberry. Orange scarlet.

PORTSMOUTH, N. H., Feb. 29, 1896. The seeds and bulbs you sent were received in good order. The bulbs I had from you in the fall are now, and have been, just lovely. I have a number in bloom.

MRS, H. G. TANTON.

ST PAUL, Minn., Apr. 8, 1896.
The express package containing bulbs and seeds received in good shape, and I am very grateful to you for the generous way you have treated me. I am more than satisfied.

JAS. L. BRYANT.

GERANIUMS-Continued.

La Favorite. White; dwarf habit and fine bedder.

Lepistrata. Large pink.

Louis Mayet. Dark crimson.

M. Dupre. Magenta; one of the best.

Mme. Jaulin. Pink.

Pierre Crozy. Soft bright scarlet with veinings of maroon.

Raspael's improved. Rich crimson.

S. A. Nutt. Rich bright crimson.

Vicomiesse de Pavillon. Large lavender flowers.

White Abbey. Fine open flowers of the purest white; beauful dwarf spreading habit.

Price, 10 ets. each, \$1.00 per doz.

SINGLE.

Alphonse Chardin. Rich pink.

Amy Amphlet. Pure white.

Camille Bernardin. Pink.

Fleur Poitevine. Deep rose.

General Dodds. Rosy violet infused with carmine; petals spotted white.

Jeanne d'Arc. White, with pink markings in center.

L. Aube. Large, pure white flower.

Marquis of Dufferin. Dark crimson.

Mme. Bourguiet. Clear rose pink.

Mme. Bruant. Large flower, white center, edge Jacqueminot.

Mme. Chas. Molin. Light pink.

Mme. Rochelin Schwartz. Pure white; large truss.

Mrs. E. G. Hill. The center of each petal is a soft, light salmon, bordered with rosy salmon and veined deep rose.

Pierre Duchartre. Pink, salmon center.

Ville de Portiers. Rich scarlet.

Vulcan. Scarlet.

Price, 10 cts. each, \$1.00 per doz.

IVY LEAVED GERANIUMS.

Galilee. Double. Light rosy plnk veined with lilac; extra good.

Jean d'Arc. Double. A grand variety; the nearest approach to a pure white in the family.

CARTHAGE, Ind., May 4, 1896.

The box of bulbs came safely to hand. I have never seen such fine Lily bulbs, and such fine clumps of hardy plants are not commonly sent out.

THOS. T. NEWBY.

Souv. Chas. Turner. Double. One of the handsomest ever introduced. Color deep bright pink, approaching scarlet; upper petals feathered maroon.

Price, 15 cts. each; \$1.50 per doz.

GREVILLEA.

robusta. Silk Oak. A graceful small tree or shrub, with fine fern like leaves. One of the easiest grown greenhouse plants, and one of the best. 35 ets.

HEDERA (Ivy).

The graceful free growing Ivies are indispensable for the decoration of rooms and conservatories. We offer the best sorts in variety. 25 cts.

HELIOTROPES.

Albert Delaux. Flowers dark violet; leaves variegated with yellow.

Anna Delaux. Rose violet.

Chameleon. Lilac; flowers large and fine.

Chieftain. Deep lilae; large truss.

White Lady. White; very fine; large truss.

Price, 10 cts. each, \$1.00 per dozen.

HYDRANGEA.

hortensis. Pink flowers. 50 cts.

hortensis Otaksa. Flower heads immense, pale pink. 50 cts.

IMANTOPHYLLUM.

miniatum. A beautiful plant, with long, leathery leaves and flower stems two feet long, topped by large clusters of deep orange red flowers. Also known as Clivia miniata. 75 ets.

LANTANAS.

Free blooming plants, suitable for summer bedding, vases, baskets or pot plants. They are easily grown and may be wintered in a cellar. 10 cts. each, \$1.00 per dozen.

LASIANDRA.

macrantha. This plant bears large, handsome flowers of deep violet purple; mid winter. 25 cts.

LIBONIA.

floribunda. Very attractive and profuse flowering; blossoms scarlet and yellow. 50 ets.

LAUREL, Md., July 27, 1896.

The seeds and plants were duly received. Accept many thanks for your promptness in filling my order and the generosity of your firm.

MRS. ALBIN M. LONG.

LINUM.

trigynum. No plant that we grow for winter has brighter, cheerier flowers of a more pleasing shade of yellow. It is very prodigal of its large, round, deep orange flowers, being in bloom almost all the time. Of the easiest culture. 20 cts.

PELARGONIUMS,

or Lady Washington Geraniums.

These have leaves very distinct from those of other Geraniums, and large, widely opened flowers, often marked like Pansies, with velvety blotches and stripes. 20 cts. each, \$2.00 per doz.

PLUMBAGO.

capensis. "Leadwort." The bright, unusual shade of blue seen in the flowers of this pretty shrub make it very popular. The flower panicles are large and abundantly produced; leaves small. 15 cts. each, \$1.50 per doz.

capensis alba. A white form of the preceding. 15 cts. each, \$1.50 per doz.

Swainsona galegifoha alba.

SAINTPAULIA.

ionantha. "African Violet." This is a valuable new addition to our winter flowering greenhouse plants, producing a profusion of beautiful blue flowers on slender stems. The individual flower very much resembles a single Violet. The leaves are fleshy, oval in shape, of a deep green color, the surface being quite hairy. 35 cts.

Linum trigynum.

SCUTELLARIA.

Mociniana. A very beautiful heat loving shrub. The flowers are showy, bright scarlet, tubular, and about 1½ inches long; inside of the lip bright yellow, and the whole tube pubescent. The leaves are dark green, and the plant rapid growing and very free of its flowers. 35 cts.

SWAINSONA.

galegifolia alba. A very graceful and dainty ever blooming plant, producing 12 to 15 flowers on a spray, the flowers being shaped like a Sweet Pea. It is very useful as a window decorative plant, thriving admirably in almost any good, light situation. Also flowers profusely if planted out of doors during the summer, making it invaluable for cutting, as the dry season will have no effect upon it. 15 cts.

galegifolia rosea. A beautiful pink form of the preceding, and a variety which is destined to become very popular, as it throws out long spikes of beautifully colored pink flowers in great profusion the entire season. 20 cts.

VINCA.

major variegata. Large Leaved Creeping Myrtle.
 A beautiful creeper with glossy, round, opposite leaves of green and white. Quick and strong growing. 25 cts.

RICHMOND, Va., Oct. 7, 1896.

I have received the bulbs and Violets ordered, and find them in good order and very satisfactory. I have to thank you for the premium collection sent with them.

G. F. JONES.

BUFFALO, N. Y., May 30, 1896.

I wish to thank you for the excellent treatment you have accorded me. I have never received from anyone such fine plants as I have from you this year.

JOHN CROSS.

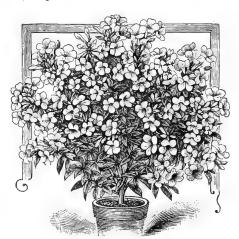

Greenhouse Flowering Vines.

ALLAMANDA.

Hendersonii. Flowers light yellow. 35 cts.

nobilis. Bright yellow, with deeper throat. 35 cts.

Williamsii. A handsome new variety. Flowers large, light yellow, very abundant. 50 cts.

Allamanda Williamsii.

ARISTOLOCHIA.

elegans. Leaves small, smooth; vine of slender, elegant habit, well adapted for covering pillars and trellises. The flowers are richly spotted and have no unpleasant odor. 35 cts.

grandiflora. 50 ets.

ridicula. 50 cts.

BIGNONIA.

venusta. A brilliant Brazilian species, with blossoms in large, many flowered terminal corymbs; color bright crimson; very handsome. 50 cts.

BOUGAINVILLEA.

glabra. Rose colored bracts. 50 cts.

glabra Sanderiana. In this variety the flower bracts are dazzling, rosy crimson, and remain bright and perfect for weeks. 75 cts.

splendens. One of the most beautiful species, with very large bracts of bright, clear pink. 50 cts.

CLERODENDRON.

Balfourianum. One of the freest blooming and most attractive climbers for greenhouse or conservatory. The growth is free and graceful, and the scarlet and white flowers pretty and curious; they are borne in large, loose clusters. 35 cts.

GOUVERNEUR, N. Y., Oct. 5, 1896.

The Orchids and Ferns came in fine shape and are beautiful large plants. Thanks for such fine ones. I hope they will prove as amenable to treatment as the others. I can ask nothing better of them.

MRS. E. C. ANTHONY.

IPOMOEA.

Horsfalliæ, Digitate leaves; flowers glossy rose. 35 cts.

Learii. Mexican Moonflower. Flowers intense blue and satiny. 25 cts. (See cut page 79.)

JASMINUM.

gracillimum. Flowers large, pure white; exceedingly graceful and elegant in habit. 25 cts.

LAPAGERIA.

alba. Flowers pure white, waxen, dainty and elegant. one of the best and finest species. \$3.50. (See cut page 79.)

rosea. Large flowers of rich, rosy crimson. A beautiful contrast for the above when the two are grown together. \$2.50.

MANETTIA.

bicolor. This beautiful little vine has tubular scarlet flowers, tipped with bright yellow. It is continually in bloom. 15 cts.

PASSIFLORA

cærulea. This is one of the finest of the Passifloras, the petals being light blue. Very strong growing variety and free flowering, producing its large and beautiful flowers from June to October; also faintly scented. 25 cts.

Bougainvillea glabra Sanderiana.

PLAQUEMINE, La., May 4, 1896.

plants you sent me arrived in first class condition and are all doing nicely. I thank you very much for the extra plants you sent

CHAS. H. DUPUY.

PASSIFLORA-Continued.

Constance Elliott. This is a beautiful white flowered form, deliciously scented. Very free grower and bloomer, and does well out of doors during the summer months. 25 cts.

quadrangularis variegata. Flowers blue; leaves broadly oblong, angular in outline, irregularly spotted with yellow, 35 cts.

Ipomæa Learii.-See page 78.

RHYNCHOSPERMUM.

jasminoides. The white, clustered flowers of this vine resemble the Jasmines, except that each petal is slightly twisted at the base. Very fragrant; leaves thick, dark green and glossy. 50 cts.

STEPHANOTIS.

floribunda. White, waxen flowers, star shaped and delightfully scented. A grand old climber that is always admired. 50 ets.

Lapageria alba.—See page 78.

STIGMAPHYLLON.

ciliatum. The Golden Butterfly Vine of Brazil. Flowers borne in showy umbels, golden yellow, with fringed petals and long claws. The vine grows rapidly and climbs high. 35 cts.

TACSONIA.

Buchanani. Sometimes known as Passiflora vitifolia. Flowers yellowish orange. 75 cts.

exoniensis. Another name for the handsome scarlet Passion Flowers. $50 \mathrm{\ cts.}$

Greenhouse and Garden Collections.

O aid those who are unfamiliar with the great number of plants so useful for home adornment, we offer below four separate collections,—Palms, Orchids, Chrysanthemums and Hardy Flowering Plants,—in which we have made the very best selections possible. In Palms we have selected only such varieties as are best adapted for general house culture and decorative purposes. In Orchids our selection includes those of the easiest culture and the best for flowering purposes. In Chrysanthemums the varieties mentioned have proven the most vigorous growers, producing the largest exhibition blooms. In the small list of Hardy Flowering Plants it has been our aim to make a selection suitable for a small garden, which will give a continuation of bloom throughout the greater part of the season. All the plants named will be packed and delivered f. o. b. express station at Short Hills.
